Tank Closure
at
300 Waughtown Street
Winston-Salem, N.C.

The above referenced site was used as a service station approximately 30 years ago, and since that time the USTs were not used. The site has been paved and neither the existence nor the location of the USTs were known by the present owner.

Beauchamp Inc. scanned the site with a metal detector and found 3 possible UST locations. Upon excavating the site, we found two (2) 1,000 gallon tanks and the third location proved to be an old cast iron pipe and electrical conduits.

The two tanks that were removed were transported to Safeway Tank Disposal Inc. for disposal (copy of receiving report attached).

During excavation and tank removal the site was scanned with a flame ionization detector with no " Hot Spots " or high readings being detected.

Samples were taken at each end of the two tanks (see map). These samples were taken by hand approximately 18" below the bottom of each tank, and placed in glass vials, marked and sealed. The sample vials were placed in an ice chest and were later transported to Guilford Laboratories Inc. for analysis (report attached).

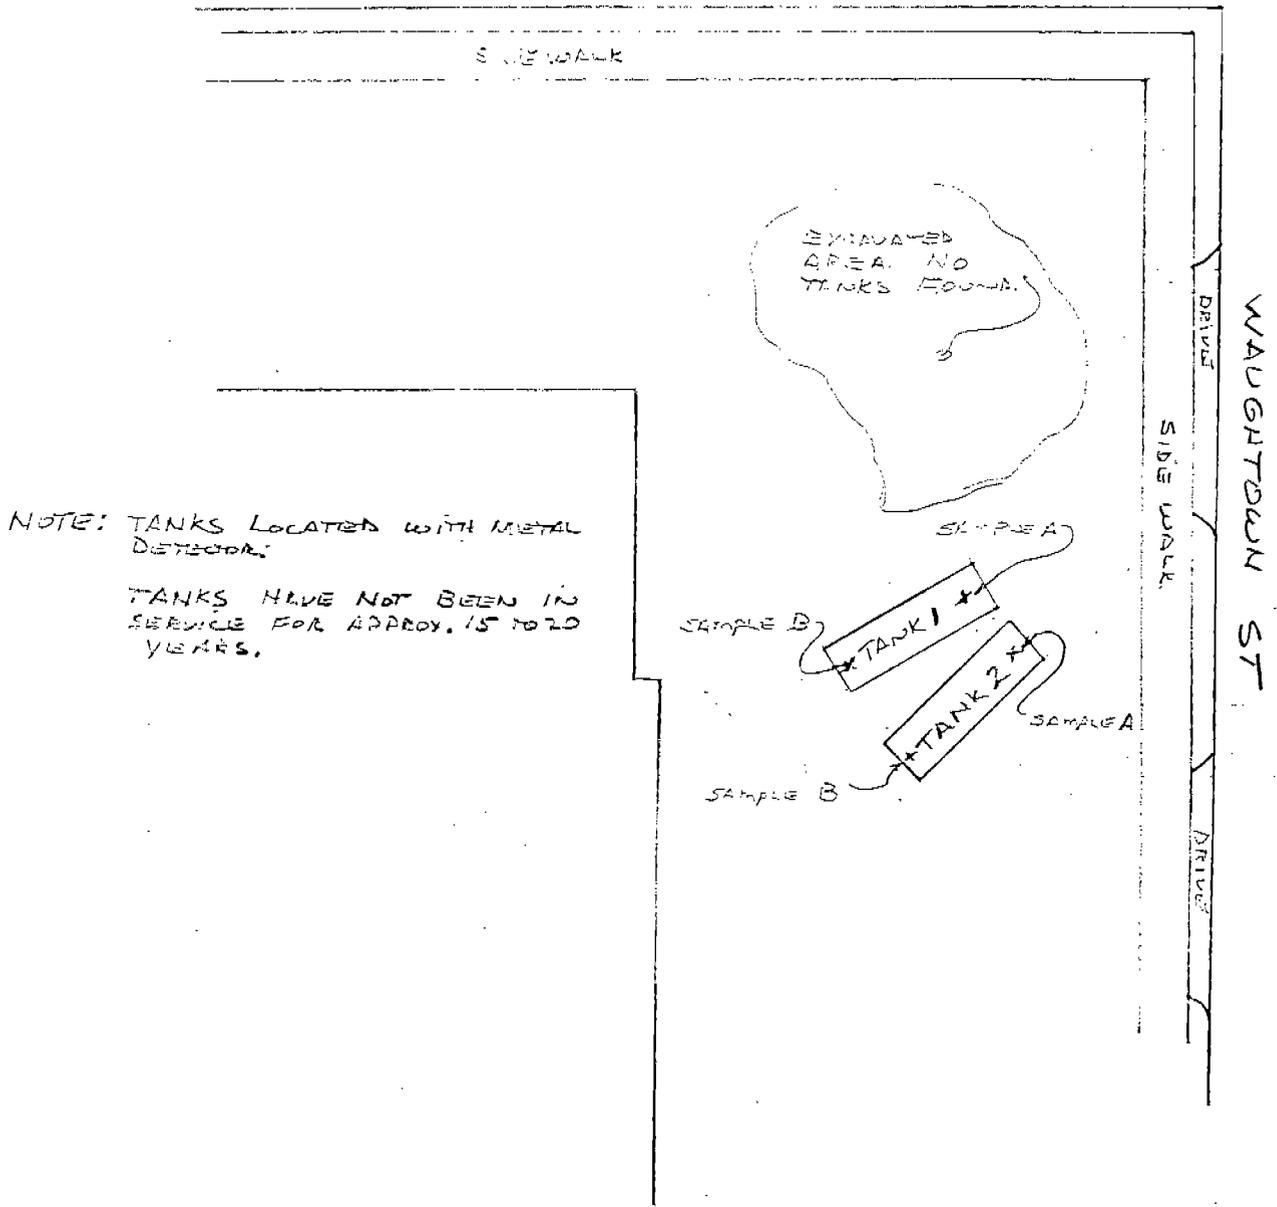

The excavated area was backfilled and covered with 6" of ABC stone.

Respectfully,
Beauchamp Inc.

TANK REMOVAL

SITE LOCATION: 300 WAUGHTOWN ST.
WINSTON-SALEM N.C.

CHAPEL ST.

NOTE: TANKS LOCATED WITH METAL DETECTOR.
TANKS HAVE NOT BEEN IN SERVICE FOR APPROX. 15 TO 20 YEARS.
