Re: Quarterly Progress Report
January 2012 through March 2012
DuPont-Kentec Site
4610 Braxton Road
Grifton, North Carolina
Site ID No. NONCD 002818
URS Project No. 18985580

Dear Ms. Macdonald:

This quarterly progress report has been prepared by URS Corporation–North Carolina (URS), to document progress at the DuPont-Kentec site located at 4610 Braxton Road (the site) in Grifton, North Carolina during the period of January 2012 through March 2012. This quarterly report meets the requirements set forth in Section III E of the consent agreement entered into by DuPont Corporate Remediation Group and Unifi Kinston, LLC on June 4, 2010. During the period of January 2012 through March 2012, the following activities were completed or are currently ongoing:

- On June 4, 2010, DuPont Corporate Remediation Group (DuPont) and Unifi Kinston, LLC (Unifi) entered into an Administrative Agreement (AA) for Registered Environmental Consultant-Directed Assessment and Remedial Action pursuant to N.C.G.S. 130A-310.9(c) and 15A NCAC 13C .0300 for the site.
- On August 8, 2011, URS submitted a Groundwater Sampling Notification per Corrective Action Plan Modification (dated October 2005), to Ms. McDonald of the NCDENR informing the REC Program that groundwater sampling activities were scheduled to occur in late August/early September in accordance with the sampling requirements put forth in the Corrective Action Plan Modification submitted to the NCDENR in October 2005 and approved by the NCDENR in January 2006. On September 12, 13 and 14, 2011, groundwater and surface water samples were collected from eighteen (18) monitoring wells and four (4) surface water sampling points. Subsequent groundwater and surface water analytical result review, tabulation and graphical depiction in respect to groundwater flow dynamics was completed during October and November 2011.
- A Groundwater Quality Monitoring Report, documenting the sampling activities completed in September 2011, is being prepared in accordance with the reporting requirements put forth in the October 2005 Corrective Action Plan Modification

Page 2

(approved by the NCDENR in January 2006). This report will also document groundwater sampling events completed at the site in November 2007, November 2008 and December 2009 which have not been previously submitted to the NCDENR.

- On September 15, 2011, a potable water well survey was completed to update previous water well surveys to identify households that may utilize groundwater for potable uses within the ½ mile radius as specified within NCDENR-IHSB guidance documents.
- A Remedial Investigation Completion (RIC) report has been completed to document remedial investigation activities performed at the site. This report meets the requirements set forth in Section III B of the consent agreement entered into by DuPont Corporate Remediation Group and Unifi Kinston, LLC on June 4, 2010. As most of the remedial investigation requirements pursuant to 15A NCAC 13C .0306(g) and .0306(h) had already been completed as part of previous site assessment actions (as directed and approved by the NCDENR), this RIC report serves to: (1) demonstrate that the component requirements of .0306(g) and .0306(h) have been met; and, (2) reference where the component requirements of .0306(g) and .0306(h) can be located in existing documents on file with the NCDENR. The RIC Report also includes updated information where relevant and/or where the existing data did not sufficiently meet the component requirements of .0306(g) and .0306(h). This additional information includes; updated groundwater quality and flow data (as sampled in November 2007, November 2008, December 2009, and September 2011), updated potable water well survey (completed in September 2011), and a site survey plat to be prepared in accordance with .0306(g)(4). The site survey is tentatively scheduled to occur before June 2012. Submittal of the certified RIC Report to the REC Program will occur upon completion of the site survey.

Work at the site, being completed in accordance with the requirements of the June 4, 2010 REC AA, is progressing in a manner to achieve the mandatory work phase completion deadlines set out in 15A NCAC 13C .0302(h).
