Reference: Quarterly Status Report
Trion, Inc., Sanford, NC
NONCD 0002843
H&H Project No. BAI.002

Dear Ms. MacDonald:

Hart & Hickman is pleased to provide this quarterly status report for the above-referenced site. Field activities outlined in the Remedial Investigation Work Plan (RIWP), dated October 20, 2010, were completed in late February and March 2011. Details regarding the work completed were included in the quarterly report submitted in April 2011.

The data from those activities were evaluated and due to trichloroethene (TCE) being detected in a well installed on the adjacent property at a concentration of 30 ug/l, the well was re-sampled in May 2011. The results of the re-sampling confirmed the presence of TCE at a similar concentration (34 ug/l). The Remediating Party (RP) notified the adjacent property owner and the REC Program was notified in an email dated June 20, 2011.

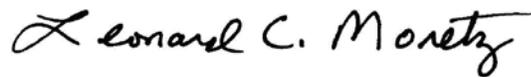

The level of TCE is relatively low and the well is very close to the RP's property line so it is unlikely that a significant portion of the adjacent property has been impacted. No field activities or reporting (other than quarterly progress reports) have completed since April 2011. However, installation of three additional wells is planned to delineate the plume on the adjacent property in the near future. The Remediating Party recently received site access to install two shallow and one deep well on the adjacent property. The wells will be located as shown on the attached figure and will be installed following protocols outlined in the October 2010 RIWP. Details of the entire remedial investigation will be included in a Remedial Investigation Report once the additional work is completed and the results are evaluated.

Ms. Janet Macdonald
