REC-AA (REV. 12/16/10)
DOCKET NUMBER 10-SF-329
Effective Date June 4, 2010

STATUS UPDATE:

The following is provided as the April 2012 status update for the above-referenced project. The fieldwork proposed in the Remedial Investigation (RI) Work Plan has been completed.

Analytical results from groundwater sampling detailed in the May 17, 2011 RI Work Plan revealed no North Carolina Administrative Code Title 15A Subchapter 02L exceedances in the monitoring well MW-01 or in the directly down gradient well MW-02 groundwater samples. Soil sample results provided in the January 2012 status report indicate additional soil sampling is required. In an attempt to minimize analytical costs at phased approach sampling was proposed in accordance with the RI Work Plan. Once analytical data from this phase is received and evaluated, additional testing will be proposed.

To date the soil sample locations have been laid out and utility locations are being located. Background locations have been proposed and are under evaluation.

Once results are obtained for background sampling and additional soil sampling testing as previously proposed, CATLIN and Coca-Cola Bottling Company Consolidated personnel will review the data and propose additional investigations to delineate contaminants.

Work is progressing in a manner to achieve the mandatory work phase completion deadlines set out in 15A NCAC 13C.0302 (h)
