**Subject:** Watauga County Permit ID

Hey Mary,

Per our phone conversation, I am requesting a change in the Permit ID for the Watauga County Landclearing facility, Permit number 9502TP-TP. As is obvious, the name references the LCID disposal unit that was permitted in 2012, but the Permit ID only references the T&P unit at the facility. The T&P was originally permitted in 2001. Sometime later they were allowed to operate a notified (less than 2 acre) LCID landfill at the site. In, 2012 they expanded their LCID beyond 2 acres which made it a permitted activity. Currently the LCID landfill is the primary activity at the site and the T&P (wood grinding) is treated as miscellaneous activity. As a result, I think we should change the Permit ID to match the name and more accurately represent the activities listed in the Permit. Therefore, I am requesting we change the Permit ID to 9502-LCID-2016.

As T&P and LCID facilities pay the same annual fee there is no change in costs to the facility. Additionally, I have discussed this change with Ms. Donna Watson, Watauga County, and Mr. Charles Gerstell, FOB Inspector, and both agree with the change. Let me know if you have any questions or concerns.

Thanks,  
Allen
