Re: Imminent Action Notice of Violation, Docket Number 2007-050

Dear Mr. Absher:

I have received and reviewed the Soil Remediation Report submitted for the used oil release from the 550 gallon used motor oil tank at your site.

After the second excavation event, it appears that all of the oil contaminated soil has been remediated. The excavation may be backfilled at this time. No further action is required for this incident. I strongly recommend secondary containment be installed and weekly inspections conducted on this tank to ensure that this type of incident does not occur in the future.

If you have any questions concerning this matter, please contact me at the number listed below.

Sincerely,

Roberta Proctor, Environmental Chemist  
Hazardous Waste Section
