Dear Mr. Hudson:

During our recent annual inspection of the Third Creek Monofill, Waters Edge Environmental, LLC (Waters Edge) noted the overall conditions of the site to be very good. No subsidence or irregularities were noted with the trenches. No erosion was noted in the trapezoidal ditch. Since the last inspection, vegetative cover has become thicker on the tops and slopes of the trenches. Site security was found to be good with fencing in good condition and locked. All monitoring wells were well protected and were locked.

Waters Edge recommends that the area be mowed after the grass seed heads have developed to help overseed. We also recommend that the soil be tested for pH and for nutrient levels as needed. The overall site was found to be in excellent condition.

If you have any questions or require any additional information regarding these activities, please contact us at (919) 859-9987

Sincerely,

WATERS EDGE ENVIRONMENTAL, LLC

Phillip L. Rahn, P.G.
