Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

A handwritten signature in black ink, appearing to read "Dexter R. Matthews". The signature is written in a cursive, somewhat stylized font.

Currituck, North Carolina 27929

Dear Mr. Pervier:

I am sending a copy of your request to Mr. Fred J. Wood, District Sanitarian, requesting that he visit the county and discuss the development of a solid waste program that will meet the needs of the entire county.

If additional information or assistance is needed, I shall appreciate hearing from you.

Very truly yours,

Sidney H. Usry, Head
Solid Waste & Vector Control Branch
Sanitary Engineering Section

Raleigh, North Carolina

Dear Mr. Usry:

Thank you for your offer to assist us with the development of a solid waste management plan for Currituck County (re: our telephone conversation of Friday, August 10th).

You are probably familiar with "The Currituck Plan", a unique local-State-Federal partnership for physical and environmental management planning for Currituck County. In addition to the immediate need to improve on our present system of open dumps and unregulated private collection of solid waste, we have the challenging task of planning for solid waste collection from future outer banks and mainland developments.

We appreciate your offer of assistance and look forward to working with you on a solid waste management plan for our county.

Sincerely yours,

Graham Pervier
County Manager

Dear Mr. Usry:

I appreciate and accept your offer of assistance in preparing a plan for solid waste management in Currituck County. I am currently making studies of population and population densities which should give us a better understanding of the solid waste problems facing the County. In the meantime, will you please send me a copy of the program recommended for Currituck, Camden and Pasquotank?

Copy sent

It appears that the regional approach to solid waste management is most logical in this area; however as I am sure you realize, parochialism is also a problem in the Northeast. At this point, I am hoping that any programs developed in Currituck will be compatible with a future regional system.

SNW

I will be in touch as soon as the population studies are complete. Should you have any questions before that time, please write or call.

Sincerely,

William B. Farris

Dear Mr. Usry,

For the past year, Currituck County has been negotiating with the counties of Camden and Pasquotank to form a 3 county solid waste disposal operation. We thought that this would be a reality this fall, however, the other two counties did not put up the necessary funds and it has been put off for another year.

This means we have to look for an alternate method until we can join the other counties. We are proposing in this interim period 3 dump areas - one at Moyock, Maple and Powells Point. Those areas are pits where the state has removed dirt and contain at times only surface water. We are planning to hire a supervisor for each area plus someone to keep the material pushed back and covered with soil from time to time.

I have discussed this with Fred and our county health director and have shown them the locations. The counties realize that this is not the best way to handle the problem, but because of the high cost of the Dumpster System, we have no other choice at this time. I hope this proposal will meet your approval for this interim period.

Sincerely,

Jerry W. Hardesty

Commissioner Health Dept.
Raleigh, N.C.

April 28, 1972

Dear Sir,

Every place you go, I see signs "Beautiful." This I am in favor of in Currituck County, the Officials, (a Mr Brown I think) in charge of Sanitary + Health, (a Mr Brown I think) evidently does not believe in the slogan.

There is not one Rest Area, or letter barrel from the Virginia line, until you go 75 miles to Jockey Ridge in Hags Head, before coming to the first letter barrel. Also, we are now told that in order to get rid of our garbage + we should bury it. Where? In the center of a lawn. Many of our officials own anywhere from 100 to 1000 acres, and dump on their own property, maybe where it might even be polluting our sounds.

Mr. Brown, (I am told) told a number of people in Coiyock, that they had to put in tanks because their cesspools were overflowing into Currituck Sound. To the best of my knowledge only one put in a tank. We do not have one public dump, and our officials are thinking about it, but say it may be months before the situation is solved.

Meanwhile, how do we eat glass, cans, Aerosol Cans etc etc.? Is the solution to just throw it out the car window onto the road ???

This was told by a Commissioner

Actually, do you people in Raleigh give a damn about the Eastern Shore? You talk tourism, and how much money it brings the State. Have you ever ridden from the Virginia line down #168 - #158 to Mag Head? Have you ever seen the junked cars in and around houses, and garages, that now have their own junk yards? Have you noticed the many, many signs, all sizes and shapes that almost hide the farm lands? Have you noticed the Pig Parlors that come right out to the road?

To verify my letter, ride this route and just see how enticing it is to tourists. Would you permit this in and around Raleigh? Hell No! Because you live in the area.

The whole is only as good as the parts that make it up. So if you want to keep Carolina Beautiful, then why let the Eastern Shore be a ride thru the slums?

We as individuals have tried to have things changed, but to no avail, so we turn to Raleigh first, and if you do not act, our next move is to Washington where we have a few friends, one in particular Congressman Jones and others. I understand that there are many low or swampy areas that could be made available for a Public Dump, and if handled correctly could be safe.

I am writing this, in behalf of the many people here in Currituck County who are greatly concerned. We expect your Dept. to take some action. Please do not try to get off the hook by saying it is up to the individual county. This county is still part of North Carolina, and our taxes, in part go to Raleigh. If you do not want any of our tax money, then we could well afford a Garbage Removal System, plus a good Sanitary Engineer who will really do his job according to the letter of the law.

I give my word, that I have not and do not plan any violations, as I am presently taking my refuse to another county. BUT IS THIS FAIR?

I am not signing this, because others and myself would really have our heads on the chopping block, but believe me it is all true.

We again ask the State for it. Then if nothing happens, we will personally go to Washington, and tell them you refused to help.

Thank You
Most Sincerely

Cyrilus
etc

Dear Mr. Newbern:

Your Notification to the Clearinghouse of Intent to Apply for Assistance has been reviewed by appropriate State agencies.

The State Board of Health questions the estimated cost figure by stating that "... \$15,000 is an inadequate amount for the purchase of necessary operating equipment and the construction of a sanitary landfill."

The State Board requests that your notification be returned to you and that another be filed after the State Board has completed the preliminary solid waste management plan for Currituck County. We will, however, retain the one on file and ask that you submit an updated one when the State Board has developed the solid waste management plan for Currituck County.

We shall appreciate your referring to Clearinghouse Notification No. 71-0423 when writing to us about this project proposal.

Sincerely yours,

Benj. D. Seymour

Re: GH No. 71-0423
Solid Waste Collection and Disposal
Currituck County

Dear Mr. Hendricks:

Currituck County is in need of an adequate and sanitary system of solid waste disposal and recently requested the State Board of Health to assist the County in the development of a solid waste management plan. This office has agreed to provide assistance, but as yet no preliminary plans have been developed.

The application for federal assistance submitted by Currituck County does not indicate the nature of the project proposed, and the estimated total project cost of \$15,000 is an inadequate amount for the purchase of necessary operating equipment and the construction of a sanitary landfill.

It is recommended that the application be returned to the applicant with the suggestion that it be resubmitted after our staff has completed the preliminary solid waste management plan for Currituck County.

Very truly yours,

Marshall Staten, Director
