Subject: Pre-Regulatory Landfill Sites in Mecklenburg County

Dear Mr. Jones:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the sites identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the sites listed below tentatively qualify under Senate Bill 1492. The approximate locations are shown in attached map.

<u>ID Number</u>	<u>Site Name</u>	<u>Site Address</u>
NCD000605097	Statesville Road LF	Northerly Ave.
NCD980502959	Harrisburg Park LF	8525 Pence Rd
NONCD0000184	Davidson Sanitary LF	Fisher Rd. (SR 2419)
NONCD0000427	Pineville Dump	Sam Meeks Rd. (SR 3638)
NONCD0000428	Davidson Landfill	Grey Rd. (SR 2417)

Work at these sites may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, IHSB *Guidelines for Addressing Old Landfills & Dumps*, was developed to assist local governments and the Unit in this work. It is available on our web site, <http://portal.ncdenr.org/web/wm/sf/ihs/ihsguide>.

Mr. Harry Jones
Subject: Pre-Regulatory Landfill Sites in Mecklenburg County
March 9, 2010
Page 2 of 2

An additional purpose in notifying you of these sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill or disposal site. More precise location information for the sites in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified sites, or need further information, please contact me at (919) 508-8473.

Sincerely,

Pat Backus

Subject: Re: [Fwd: FW: Statesville landfill]

I have been out of town and have been going through my many emails. Sorry for any delay in response. If you have an old landfill property you wish to sell or redevelop we strongly encourage you (or the parties involved) to work through our program on conducting an approved assessment of the hazards first. Following that, we can work with you on approval a final remedy/reuse plan. Proceeding with development without conducting necessary assessment of the hazards and placing the proper exposure controls in place may result in exposure of individuals to hazardous substances. We have guidance for assessment of old landfills on our web site at <http://www.wastenotnc.org/sfhome/ihsguide.htm>. Please give me a call at 919-508-8460 to talk about how reuse can be safely performed. If you can't reach me, you can also contact either Cheryl Marks at 508-8465 or Bruce Lefler at 508-8463. If development proceeds without an assessment, the developer, the owner and the operator will be taking on additional liabilities.

Joe,

Thanks for the "heads up." By way of this email I am forwarding this info to Charlotte Jesneck who is the Inactive Hazardous Sites Program Supervisor. Her program keeps a database of such sites and she may have concerns or questions.

Re: Request for Information on old unlined landfills, Mecklenburg County.

Dear Mr. Jones,

The Division of Waste Management, Superfund Section, Inactive Hazardous Sites Branch (Branch) is in the process of cataloging old landfills in the state. This letter is being sent to you to solicit your cooperation in providing information on old unlined landfills that are not subject to Division of Waste Management, Solid Waste Section post-closure regulations in your county. This process is a part of a statewide effort to accurately inventory old dumpsites to aid in safe reuse and to protect public health and the environment.

Once an old landfill site has been identified, the site location, site usage, and vicinity usage is researched. Potential hazards to the public and the environment are then evaluated by risk assessment. Sites then are reviewed based on risk and/or by safe redevelopment requests.

The Branch then works with owners and responsible parties on final solutions for containment of the waste and to ensure safe reuse of the old landfill sites. Safe reuse might involve engineering controls to prevent exposure to wastes, if necessary, and restrictive covenants limiting the property to certain uses and setting conditions for construction or other soil disturbing activities. Annual reporting that restrictive covenants remain in place will be a duty of the current owner.

Known old landfills/dump sites are maintained in a database. Attached is a listing of known sites located in your county. Available information that may include location and years of operation information for each site is also listed. Please review the list and verify or provide information that will more accurately characterize the site(s). If you have knowledge of sites not included on the list, please add the additional sites along with location information, directions, years of operation, and any additional notable information.

Please return the list and any additional information within 90 days to:

Cheryl Marks
Inactive Hazardous Sites Branch
Superfund Section
NC Division of Waste Management
401 Oberlin Road - Suite 150

RE: Landfill Lists for Mecklenburg and Gaston Counties

Please find enclosed herewith the final listing for landfills in Mecklenburg and Gaston Counties and the diskettes with the sites in Excel format. We have identified 82 sites in Mecklenburg County. However, two of these sites could not be confirmed with other sources. These sites are #19, Crescent Resources in Lemley; and #38 Huntersville Town Dump. Thus, we are only invoicing you for 80 sites. We have identified 46 sites in Gaston County.

The remaining lists of sites are in the final stages of completion and will be shipped from our office on May 25, 2001.

Meanwhile, should you have any questions, please do not hesitate to contact me.
