Reference: **Status of Greenville Dump (NONCD0000716)**
Hurricane Landfill Assessment Project
State Contract No. N200016
S&ME Project No. 1040-00362F

Dear Mr. Walch:

During our review of the "Old Landfill Inventory" database pertaining to the Greenville Dump site (NONCD0000716) and the Old Greenville City Landfill (NCD980557698), we observed similarities in the information provided, such as the directions to the site. Based on the directions to the Greenville Dump site, the site is located "adjacent to sewage treatment plant and the Tar River." These directions coincide with the location of the Old Greenville City Landfill (NCD980557698).

No coordinates for the location of the Greenville Dump site were given in the database. No other public records for the Greenville Dump were identified in the Solid Waste Section files. After additional review of state public records, we conducted interviews with local public officials familiar with the history of the area. Mr. Thomas Tysinger, Jr., Director of Public Works for the City of Greenville and Mr. Phillip Dickerson, County Engineer for Pitt County, both stated that they were unaware of a separate dump site by the name of the Greenville Dump.

www.smeinc.com

Based on our review of the database information provided, public record review, review of historical aerial photographs and interviews with local public officials, we have concluded that the Greenville Dump site is likely to be a duplication in the record of the Old Greenville City Landfill. The attached information documents our efforts to locate the site.

Please contact our office if you have any questions, comments or recommendations concerning our assessment of this site.

Sincerely,

S&ME, Inc.

Christopher Hamblet
