Re: Old landfills and Dumps
Site Summary Reports
Rockingham County, NC

Dear Mr. Asbury,

I am providing a CD copy of the site summary reports for Rockingham County for your review. These reports are generated as part of the North Carolina Department of Environment and Natural Resource's Division of Waste Management (DWM) task to identify and investigate old dumps and landfills that may have been impacted by the 2004 hurricane activity. This only applies to old unlined landfills and dumps that are not subject to DWM solid waste post-closure regulations. I appreciate any information that you may provide to improve the accuracy of our records for these old landfills and dumps.

If you have any questions please call me at (919) 508-8465.

Sincerely,

Cheryl Marks, Hydrogeologist
Inactive Hazardous Site Branch
NC Division of Waste Management

Dennis Asbury wrote:

Jack,

Based on information provided in a letter dated February 27, 2007 from Dexter R. Matthews to Eden's City Manager Brad Corcoran the Draper Dump NONC0000531 at State Plane X: 541038 Meters and State Plane Y: 306807 is actually located in the area of Eden that was formerly the Town of Spray. From our telephone conversation I understand that some of the 700 old landfill sites identified by NC-DENR-DWM date to the 19th century. I've talked with some long time residents of the Spray area including our recently retired Director of Public Works, Benny Sexton who lives in the Spray area of the city. None of these people has any recall of a dump being located on the property described by the state coordinates in the attachment to Mr. Matthews' letter. This property is owned by the City of Eden and managed by the Recreation Department as a ball field. Please add this information to your database for this site.

Subject: Pre-Regulatory Landfill Sites in Rockingham County

Dear Mr. Robinson:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the sites identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the sites listed below tentatively qualify under Senate Bill 1492. The approximate locations are shown in the attached map.

<u>ID Number</u>	<u>Site Name</u>	<u>Site Address</u>
NONCD0000531	Draper Dump	Park St
NONCD0000532	Stoneville Dump	Snead Rd
NONCD0000533	Spray Dump	7487 Hwy 14
NONCD0000534	Leaksville Landfill	1050 Klyce St
NONCD0000535	Hopkins Garbage Dump	338 Barnes Rd
NONCD0000536	Madison Landfill	Old Covered Bridge Rd
NONCD0000537	Reidsville Landfill	Goldwater Trail

Work at these sites may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, IHSB *Guidelines for Addressing Old Landfills &*

Page 2 of 2

Dumps, was developed to assist local governments and the Unit in this work. It is available on our web site, <http://portal.ncdenr.org/web/wm/sf/ihs/ihsguide> .

An additional purpose in notifying you of these sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill or disposal site. More precise location information for the sites in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified sites, or need further information, please contact me at (919) 508-8473.

Sincerely,

Patricia M. Backus, P.E.

Subject: Old Landfill GIS Shapefile

Ted,
You made a request sometime in the past to obtain a copy of a GIS shapefile of the old landfill disposal areas in your county.

The data is now available at:

http://portal.ncdenr.org/c/document_library/get_file?p_l_id=116721&folderId=364024&name=DLFE-30316.zip

Please note this is not our final determination of the actual disposal area but an estimate based on historical information.

<SAL> <FIRST> <LAST>, County Manager
County of <MUNICIPALITY>
<ADDRESS>
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

Hi Cheryl,

As discussed in our telephone conversation, I have checked with the Rockingham County Environmental Health and County Tax departments as well as Hugh Jernigan, our local Waste Management Specialist. We have not determined any additional old sites in Rockingham County or changes to the data for the sites you listed from your current database.

If I can be of further assistance, please let me know.

Thanks, Jack

Re: Request for Information on old unlined landfills, Rockingham County.

Dear Mr. Robinson,

The Division of Waste Management, Superfund Section, Inactive Hazardous Sites Branch (Branch) is in the process of cataloging old landfills in the state. This letter is being sent to you to solicit your cooperation in providing information on old unlined landfills that are not subject to Division of Waste Management, Solid Waste Section post-closure regulations in your county. This process is a part of a statewide effort to accurately inventory old dumpsites to aid in safe reuse and to protect public health and the environment.

Once an old landfill site has been identified, the site location, site usage, and vicinity usage is researched. Potential hazards to the public and the environment are then evaluated by risk assessment. Sites then are reviewed based on risk and/or by safe redevelopment requests.

The Branch then works with owners and responsible parties on final solutions for containment of the waste and to ensure safe reuse of the old landfill sites. Safe reuse might involve engineering controls to prevent exposure to wastes, if necessary, and restrictive covenants limiting the property to certain uses and setting conditions for construction or other soil disturbing activities. Annual reporting that restrictive covenants remain in place will be a duty of the current owner.

Known old landfills/dump sites are maintained in a database. Attached is a listing of known sites located in your county. Available information that may include location and years of operation information for each site is also listed. Please review the list and verify or provide information that will more accurately characterize the site(s). If you have knowledge of sites not included on the list, please add the additional sites along with location information, directions, years of operation, and any additional notable information.

Please return the list and any additional information within 90 days to:

Cheryl Marks
Inactive Hazardous Sites Branch
