Subject: Comments on Work Plan & Cost Proposals: Rocky Knoll 787DP-10 & 787DP-11 for confirmation Groundwater & Cover Soil

Hi, Tim:

The Work Plan

- 1). **Cover page:** Remove the typo "**712SUM**";
- 2). Collect water samples from 6 out of 8 existing or previously-installed monitoring wells (**MWs-1,3,4,5,6,8**). However, if WM-2 and MW-7 are functioning, collect additional 2 water samples from the two wells, too.

Cost Proposal 787DP-10:

- 1). **Subtask B Labor Hours:** It's way too excessive for a Project and a Tech to spend 4 days each in the field to collect 6 samples from **existing or already installed wells** in a relatively tight footprint. Reduce significantly the number of Project and Tech office and field hours.
- 2). **Subtask E:** Remove Senior hours. Reduce Project hours.

Cost Proposal 787DP-11:

- 1). MMA have been with the Unit's Program for more than 4 years now. The work flow and templates are well-established or of routine. According to our management and co-workers, reports done by such a well-adjusted contractor should not be cost for more than \$1500 in most of the case. (You've already got 8 CAD hours in Subtasks B and C, and you've had the base CAD drawings already...). Please reduce the reporting costs. Contact me if you have questions. Thanks.

I look forward to your revision soon.

My best,

Chen
