Re: ISSP/ACP Former PCA facility, Matthews, NC.

Dear Mr. Kelly:

I have reviewed the ISSP/ ACP submitted on behalf of your client, CPI Corporation, for the assessment and remediation of the site referenced above. The plan has been approved with the following amendments:

1. All areas that had Silver concentrations above the NC SSL must be excavated.
2. Please show in a diagram the location of the previously selected background samples and the proposed background samples.
3. To reiterate, to obtain a "clean closure" or "no further action" letter from this Section, the site must be cleaned up to the NC Hazardous Waste Section Soil Screening Levels, not health-based or industrial levels. If levels exceed the SSL in the bottom of the excavation, possible groundwater sampling and assessment may be necessary.

The plan may be implemented as soon as is practical. If you have any questions, please contact me at the number listed below.

Sincerely,

Roberta Proctor, Environmental Chemist
Hazardous Waste Section
