RE: PROVISIONAL EPA ID: # NCP110112070
PIEDMONT NATURAL GAS - MONROE

Dear Facility Contact:

The above Provisional EPA ID Number has been assigned to your facility as a handler of hazardous waste. This number is to be used for the hazardous waste activity as described on the application. Specifically, please note that the Provisional EPA ID Number is for the shipment of hazardous waste from none other than the facility and site identified on the application. This number is effective for a period of ninety (90) days only.

All handlers of hazardous waste are required to pay an annual fee. N.C.G. S. 130A-294.1 (f) requires that a person who generates greater than 1,000 kilograms (2,200 lbs.) of hazardous waste in any calendar month during the year shall pay an annual fee of one thousand four hundred dollars (\$1,400.00). Effective July 1, 2010, Hazardous Waste fees increased pursuant to the North Carolina General Statute 130A-294.1. The new hazardous waste fees may be found on page two of the attached Invoice. N.C.G.S. 25-3-506 states that a processing fee of \$25.00 will be charged for a returned check.

If you have any questions, please contact Ray Strawbridge at (919)-707-8231.

Sincerely,

Patricia Davalos
Supervisor, HWS Financial and Information Management Unit

RE: Piedmont Natural Gas- Applications for Provisional Identification Numbers

Dear Mr. Strawbridge:

Piedmont Natural Gas Company, Inc. (Piedmont) is submitting applications for provisional identification numbers for two Piedmont owned and operated facilities in North Carolina. The Monroe facility is located at 12032 Pine Bluff Road, Midland, NC 28107, and the Greensboro facility is located at 6363 Hunt Road, Pleasant Garden, NC 27313. Both locations are unmanned during normal operating conditions.

The Monroe and Greensboro facilities have not generated hazardous waste in the past. Hazardous waste has recently been generated at both of these facilities due to similar one-time, non-reoccurring activities. New pipeline regulations are requiring natural gas transmission pipelines to be inspected using a pigging device at least once every seven years. For proper inspection readings from this device, the natural gas pipelines must be cleaned using a liquid cleaning solution. The cleaning solution mixed with natural gas distillates and debris that are often found in pipelines have been captured at the aforementioned facilities. The waste product at each facility was sampled by a third party contractor and sent to a laboratory for analysis. The toxicity characteristic leaching procedure (TCLP) results indicated that concentrations of benzene in the waste accumulated at both facilities exceeds the regulatory limit set by the EPA.

The pipeline cleaning activities in these areas are now complete. Approximately 800 gallons of pipeline pigging waste was generated at Greensboro and approximately 1,000 gallons of waste was generated at Monroe. In order to properly dispose of the hazardous waste generated, Piedmont is submitting the attached applications to obtain provisional identification numbers.

If you have any questions, please contact me at (704) 731-4118 or at alicia.mooney@piedmontng.com.

Sincerely,

PIEDMONT NATURAL GAS

Alicia Mooney
Environmental Engineer
