Subject: Response to Building 614 Closure Report
Pope Army Air Field, Fort Bragg
Fayetteville, North Carolina
EPA ID # NCD981 920 648

Dear Mr. Humphrey,

Bobby Nelms and I conducted a site visit to evaluate the location of soil borings at Building 614 on July 15, 2015. While the location of the borings is adequate, additional soil samples in the general area of the initial borings to assess the soil beneath the pad must be analyzed for total metals and total volatile organics. Background samples for total metals is also recommended.

Please have the environmental consultant you plan to use contact me either by email at harvi.cooper@ncdenr.gov or by phone at 919-642-0098 to coordinate the sampling event.

If you have any questions concerning this letter, please don't hesitate to call.

Sincerely,

Harvi Cooper
