You appear to be several 100m from the known disposal footprint of area B of the closed landfill. Therefore the appropriate action is waste excavation and proper disposal.

Thanks Jason. I should have sent you the attached location plans. Based on the location of the landfill as indicated in the report, it appears to me that the debris pile is close but not within the boundaries of the closed landfill. Can you or Cheryl confirm that I am correct and the only thing necessary that has to be done is the collection and proper disposal of the waste. I will also contact Jeff Dellenger with NCDHHS HHCU and Roy Grimell with the Forsyth County Environmental Department to confirm their desire for courtesy notification and/ or permitting.

Subject: Ebert St LF report

Mr. Owens,

As discussed, here is the report on the closed landfill upstream of the property upon which I understand you to be working. If the waste discovered is indeed outside of the this area, please ensure that it is properly excavated and hauled for disposal at a site permitted to manage the waste type.

Thanks
Jason
