

**Brownfields Project #:** 08033-04-64  
**Brownfields Property:** Fontaine Fifth Wheel, 3883 South Church Street  
**Property Owner (In whole or part):** New Standard Corporation

**LAND USE RESTRICTIONS ("LUR") UPDATE**

LUR 1: No use other than industrial, in the form of light manufacturing, or commercial or may be made of the Brownfields Property. The following definitions apply in connection with the foregoing uses:

- a. Light Manufacturing: The assembly, fabrication or processing of goods and materials using processes that ordinarily do not create noise, smoke, fumes, odors, glare, or any health or safety hazards outside of the building or lot where such assembly, fabrication or processing takes place, where such processes are housed entirely within a building, or where the area occupied by the outdoor storage of goods and material used in such processes does not exceed 25 percent of the floor area of all the buildings on the property.
- b. Commercial: An occupation, employment, or enterprise carried on for profit by the owner, lessee or licensee.

LUR 3: No activities that encounter, expose, remove or use groundwater (for example, installation of water supply wells, fountains, ponds, lakes or swimming pools, or construction or excavation activities that encounter or expose groundwater) may occur on the Brownfields Property without prior sampling and analysis of groundwater to the reasonable satisfaction of DENR or its successor in function in any areas proposed for such activities, and submittal of the analytical results to DENR or its successor in function. If such results disclose to DENR or its successor in function contamination in excess of North Carolina's groundwater quality standards, the proposed activities may not occur without the approval of DENR or its successor in function on such conditions as DENR or its successor in function reasonably imposes, including at a minimum compliance with plans and procedures, approved pursuant to applicable law, to protect public health and the environment during the proposed activities.

LUR 4: Soil underlying buildings and paved, and other impervious, surfaces as identified on the plat component of the Notice of Brownfields Property ("Notice"), in the portion of the Brownfields Property denominated "CONTAMINATED AREA" on said plat, may not be exposed without a minimum of five (5) business days advance written notice to DENR, unless DENR states otherwise in writing. At the time such soil is exposed, DENR may inspect and sample, or require sampling of, the exposed soil for contaminants. If soil contamination is discovered that DENR determines would likely contaminate groundwater even if capped, or that may pose an imminent threat to public health or the environment if the contaminated soil remains exposed, as much soil as DENR reasonably requires shall be removed and disposed of in accordance with applicable law, and any other actions that DENR reasonably requires to make the Brownfields Property suitable for the uses specified in Land Use Restriction 1 above while fully protecting public health and the environment shall be taken. If soil contamination is discovered that DENR determines would not contaminate groundwater if capped or likely pose an imminent threat to public health or the environment if exposed, but would make the Brownfields Property unsuitable for the uses specified in Land Use Restriction 1 above, as much soil as DENR reasonably requires shall be removed and disposed of in accordance with applicable law or capped to the reasonable satisfaction of DENR.

LUR 6: Unless compliance with this land use restriction is waived in writing by DENR in advance in regard to particular buildings, no indoor space on the Brownfields Property may be occupied until mechanical ventilation with outdoor air is provided in compliance with the most current version of the Mechanical Ventilation section of the Ventilation chapter of the North Carolina State Building Code ("Code") or another standard approved in writing in advance by DENR. If the choice is made to comply with the Code, then i. or ii. below, as applicable, also applies.

- a. This subparagraph applies to buildings on the Brownfields Property that already possess mechanical ventilation systems.
  - i. A professional engineer registered in North Carolina shall inspect the mechanical ventilation system and shall document any measures required to bring the system into compliance with the Code.
  - ii. A heating, ventilation and air-conditioning contractor shall implement any measures documented by the professional engineer.
  - iii. A party other than the heating, ventilation and air-conditioning contractor, who is certified by the American Association of Balancing Contractors or the National Environmental Balancing Bureau, shall perform testing, adjusting and balancing of the system when any work by the contractor is complete. Within seven (7) days after its issuance, a copy of the Certified Test and Balance Report shall be submitted to DENR.

iv. The professional engineer shall provide DENR certification under seal that all reasonably detectable possible entrances for vapors, including without limitation foundation cracks, holes in concrete floors, gaps around pipes and utility lines, major cracks in walls, sumps and floor drains, have been sealed, and that the ventilation system complies with the Code. An alternate certification may be provided if it is approved in writing by DENR.

b. As to new buildings constructed on the Brownfields Property and any existing buildings lacking mechanical ventilation but required by Code to have it, within thirty (30) days following installation of mechanical ventilation, that fact shall be confirmed in writing to DENR.

LUR 13: To the extent DENR determines that entry to the Property is necessary for a party to conduct environmental assessment or remediation at the direction of DENR, or pursuant to the Agreement or a permit or order issued by DENR, that party may not be denied access to the Property for purposes of conducting such assessment or remediation. DENR shall make reasonable efforts to ensure that the scheduling of any such assessment or remediation causes minimal interference with other legal operations at the Property.
