Attachments: 603-01 Indoor Air Report(compressed).pdf

What to make sure this is in the files for the former Schrader Bridgeport site. Do I need to ask them for a CD or can you just add to CARA/Documentum?

Thanks,
Sharon

Ms. Eckard:

On behalf of Spiroflow Systems, Inc., attached please find a report summarizing the October 2012 indoor air quality sampling activities conducted at 1609 Airport Road in Monroe, North Carolina. As discussed between you and Carolina Classified.com personnel, the scheduled January 2013 event was moved to October 2012 to evaluate the indoor air quality prior to Spiroflow Systems, Inc. occupying the facility. As indicated in this report, four indoor air samples and the upwind outside sample indicated concentrations of trichloroethene in excess of the Inactive Hazardous Section Standard of 1.76 ug/M3. The highest concentration detected was the outside, upwind sample location, A-6 with a detected concentration of 3.9 ug/M3.

Based on a conversation with Mr. Steve McKinnon, we understand that the DENR may allow Spiroflow Systems, Inc. to discontinue the semi-annual indoor air sampling activities following your review of this report.

Please call if you have any questions or require any additional information.
