Subject: RE: Follow-up to 4/28/11 Letter regarding Remedial Investigation at the Paraxylene Facility - North Terminal

Jeff,
Tuesday, May 24 at 9 a.m. is fine. I'll go ahead and make the comment that I understand that much work has been done at the site and that no work will have to be repeated. The RI will be aimed at filling any gaps such as vapor intrusion. If a particular requirement of the RI has already been met, then the RI work plan would just need to reference where that is documented such as CAP, Section __, page __. I look forward to discussing further at the meeting.

Ginny,
I apologize but I proposed the wrong date. We would like to propose 9:00 am on Tuesday May 24, 2011.

Sorry for the confusion.

Jeff

Subject: Follow-up to 4/28/11 Letter regarding Remedial Investigation at the Paraxylene Facility - North Terminal

Ginny,
Hope you are doing well. I am writing this email on behalf of Flint Hills Resources (FHR) regarding your letter to them dated April 28, 2011. The letter requested a Remedial Investigation be conducted at the Paraxylene Facility within the INVISTA North Terminal in Wilmington, North Carolina. The incident number for this project is NCD000772046.

As you know FHR has historically been very proactive at this site in addressing the environmental requirements of North Carolina and/or the EPA. Currently, FHR is conducting active remedial activities and associated monitoring at the site.
