LUR 2: No building may be constructed on the Brownfields Property until the Department of Environment and Natural Resources ("DENR") has been consulted regarding the proximity of the planned building to the Brownfields Property's volatile contaminant plume. If DENR determines that the footprint of a building proposed to be constructed on the Brownfields Property would fall within 100 feet of said plume, it may not be constructed without a vapor barrier system and/or mechanical or passive vapor mitigation system approved in writing in advance by DENR. Within thirty 30 days following installation of the vapor barrier system and/or mechanical or passive vapor mitigation system, DENR shall be provided certification of proper installation under seal of a professional engineer licensed in North Carolina, as well as photographs illustrating the installation and a brief narrative describing it. With DENR's prior written approval, additional investigation activities including, without limitation, soil gas samples, performed to DENR's written satisfaction, may be conducted, and installation of a mitigation system possibly excused, so long as the proponent makes an advance written commitment to install a mitigation system if DENR so requires based on review of a report DENR deems adequate of the investigation activities.

If such results disclose to DENR contamination in excess of North Carolina's groundwater quality standards, the proposed activities may not occur without the prior written approval of DENR on such conditions as DENR imposes, including at a minimum compliance with plans and procedures, approved pursuant to applicable law, to protect public health and the environment during the proposed activities.
