Re: Site assessment per Notice of Violation Docket Number 2002-067

Mr. Robinson:

I have reviewed the Closure Report submitted for the assessment of the paint overspray area at your facility in Marion, NC. Samples were collected and analyzed according to the approved Site Sampling Plan. All samples collected and analyzed had no detectable levels of contamination with the exception of one sample with acetone at a level below the HWS Soil Screening Level. You have met the requirements set forth in the Notice and no further action must be taken for this incident. You are in compliance with Notice of Violation Docket # 2002-067.

If you have any questions concerning this matter, please contact me at 828-625-0171.

Sincerely,

Roberta Proctor, Environmental Chemist
Hazardous Waste Section

Subject: IEM Fabricators.

Date: Tue, 07 May 2002 09:30:59 -0400

From: Brent Burch <Brent.Burch@ncmail.net>

Organization: NC DENR - Asheville Regional Office

To: JESSE WELLS <JESSE.WELLS@ncmail.net>

I spoke with Mr. Robinson and he said they haven't painted since the initial investigation. All they are doing now is fabricating. However, they are planning on constructing a paint booth so they can resume painting. He said they were not on city sewer but expected to be hooked up soon. He said that there would not be a discharge associated with the booth. All paint waste will be left to dry and then disposed of at the county landfill. Sounds like there is nothing to refer to On-site Wastewater. I guess we can just close the file on this. Brent.

To: Jesse Wells <Jesse.Wells@ncmail.net>

Yes. He said that dried paint (overspray and waste) would be allowed to dry and then scraped up for disposal.
