Re: International Paper Landfill Cell 2 Sump Repair Plan  
Permit #2402-INDUS-1972

Dear Mr. Mussler:

As we discussed in our meeting at your office on August 11, 2015, we plan to conduct repairs on the primary sump of Cell 2, which will include excavating the sump, installing a connection between the two risers, and installing a portable, temporary discharge riser for additional drainage capacity. Water collected from the cell will be pumped to the head of the wastewater treatment system. The construction plan and drawings for the sump repair and the temporary sump riser are attached with this letter. We would like to start construction as soon as possible on this phase of work.

Please confirm the receipt of the repair plan and add to our file. If you have questions or concerns, do not hesitate to call Emily Gelder of my staff (910-362-3476).

Sincerely,

Gary Morrow, EHS&S Manager
