Re: Water-Supply Survey & Sampling Request
2293 Old Carpenter Lane
Lincolnton, Lincoln County, North Carolina
NCN000410439

Dear Property Owner:

The Inactive Hazardous Sites Branch (IHSB) of the North Carolina Division of Waste Management has reviewed Lincoln County tax records that indicate you may own property at the above referenced location. This review was conducted as part of a “Water-Supply Survey” of select parcels along or near Bynum Road, Southside Church Road, and Southside Road in Lincoln County. At the present time, the IHSB is proposing to sample select water-supply wells and/or springs in this area, and the IHSB has been unable to identify the source of drinking (potable) water at your property.

The purpose of this letter is to definitively determine the source of potable water at your property so that the Water-Supply Survey may be completed. In addition, the letter also is a request to obtain your permission to sample water-supply wells or springs located at or serving as a source of water for the addresses noted above. This information will allow the IHSB to continue to investigate potential risks posed by known or suspected hazardous substance releases, which have been reported in your community. **The success of our investigation may depend on your participation.**

If you grant permission for sampling of your water supply, you would not have to be present to have your well or spring sampled, and there would be **no cost** to you. A groundwater sample would be collected from a faucet near the well or spring house or along an exterior wall of the structure. Subsequently, the sample would be submitted for laboratory analyses and a copy of the results will be sent to you at the address noted above.

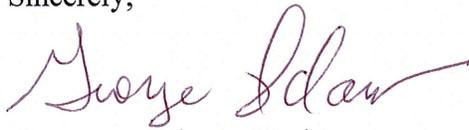

Please complete the enclosed Water-Supply Survey by indicating the current source of potable water at your property, if your property is improved with buildings and structures, and if your property is currently occupied. If the source of water at your property is groundwater from a water-supply well or spring, please attempt to answer the remaining questions on the survey. To complete the form, indicate if you “would” or “would not” like to have your water-supply sampled and return the survey to me in the enclosed self-addressed and postage-paid envelope **by June**

10, 2016. The fieldwork associated with water-sampling has been tentatively scheduled for the week of June 13, 2016.

Because your property may obtain potable water from another source such as public water or your property may not have a water-supply well or spring, it is important that you respond to this information request by returning a completed survey. This will allow the IHSB to correctly identify the source of drinking water at your property and focus our limited resources. If you have questions or need assistance completing the survey, please contact me at george.adams@ncdenr.gov or (704) 663-1699.

Sincerely,

George D. Adams, Engineer
Division of Waste Management, NCDEQ
