Re: Delineation Phase Activities
Old Raleigh LF #4
Raleigh, Wake County, NC
NONCD0000687

Dear Mr. Knox:

This letter is to inform you that remedial investigation – delineation phase activities will begin on June 7th at the pre-regulatory landfill located on your property. This phase includes waste disposal boundary delineation, above ground vapor sampling, and surface water/sediment/seep sampling.

A drill rig will be utilized to advance borings approximately every 50 feet around the perimeter of the waste disposal area as indicated in the first phase report. At least one offset boring will be required for each drilling location. Cars will need to be moved in order for drillers to access the perimeter of the property. I understand this will likely interrupt your business, however your cooperation is appreciated. Vapor and water sampling will be completed with hand-held equipment. The contractors are scheduled to arrive at your site at 8:00 am. CDM Smith Staff will be onsite for approximately four days.

If you have any questions about site activity or anything else related to the investigation, please don't hesitate to call me at (919) 707-8227.

Sincerely,

Analee Thornburg, Hydrogeologist
Division of Waste Management, NCDEQ
