RE: Review of Progress Monitoring Report for 3rd and 4th Quarters 2014
Abbott Labs, Hwys 401 and 15/501
Laurinburg, Scotland County
NONCD000040

Dear Mr. Michols,

This acknowledges receipt on January 15, 2015 of the above referenced report. The North Carolina Inactive Hazardous Sites Branch (IHSB) has reviewed the document and finds it to be complete. Based on our December 3, 2014 conference call and subsequent discussions on January 9, 2015, it's our understanding that Abbott is interested in investigating possible risk based closure under HB 45 and is in the process of developing a work plan in this regard. We will assume that the workplan is still on schedule for submittal unless we should hear otherwise.

If you have any questions regarding this correspondence, please feel free to contact me at 910.433.3343 or email me at: sean.boyles@ncdenr.gov

Sincerely,

P. Sean Boyles, PG
