**Subject:** Submittal of Quarterly Update Report – July 2016  
American Skin Food Group, LLC; 140 Industrial Dr., Burgaw, Pender County, North Carolina  
Site ID #: NONCD0001996  
HES Project #221007

Dear Ms. Macdonald:

On behalf of the American Skin Food Group, LLC (ASFG), Highlands Environmental Solutions, Inc. (HES) hereby submits this Quarterly Update Report for the above referenced site.

ASFG is a production facility that produces pork rind pellets and snacks from pork skins, and is located on Industrial Drive, in Burgaw, North Carolina. Environmental assessment activities began at the site in 2012, when groundwater impacted by chlorides, ammonia nitrogen and total chromium, was detected at the site during environmental due diligence assessment activities completed by Smithfield Foods who subsequently purchased an operating interest in the plant.

The subject site is situated in an area of mixed industrial, office, and residential land uses. The site and surrounding properties have access to municipal water and sewer services provided by the Town of Burgaw.

The subject site entered the Registered Environmental Consultant (REC) program in January 2014 and the REC – Administrative Agreement (AA) was executed in January 6, 2014. HES is the REC for this project, and Mr. Joe Beaman, P.G., RSM is the Registered Site Manager. In January 2014, HES submitted a *Phase I/II Remedial Investigation Work Plan* for the subject site. Remedial investigation activities are being conducted at the site, and a Remediation Investigation Report is being compiled.

Concentrations of ammonia nitrogen and total chromium have remained at concentrations less than the North Carolina Groundwater Quality Standards since 2014. Concentrations of chloride remain at concentrations greater than North Carolina Groundwater Quality Standards in only three groundwater monitoring wells at the site. This project continues to progress in a manner to achieve each of the mandatory work phase milestones established in the REC Program (as presented in 15A NCAC 13C .0302(h)). Completion of the Remedial Investigation phase of this investigation is required by January 2017, and we anticipate submitting the RI Report for this site in August 2016.

Document certification information is presented in **Attachment 1** of this document. If there are any questions regarding this correspondence, please contact me at (919) 848-3155.

Sincerely,

**Highlands Environmental Solutions, Inc.**

Joe Beaman, P.G., RSM  
Principal Geologist
