JFD Electronics/Channel Master NPL Site Oxford, North Carolina

Prepared by: Nanjun Shetty, P.E. – Project Manager, July 8, 2016

Activities in June 2016

Groundwater Remedial Action Implementation

- AECOM personnel performed the routine operation and maintenance of the groundwater remediation system on June 27, 2016. The system was operating normally.
- AECOM is preparing groundwater capture zone evaluation modeling for the Site.
- AECOM is preparing a summary report of data collected from the additional investigations at the site.
- AECOM is preparing April 2016 semi-annual groundwater monitoring report.
- AECOM received a letter titled *Comments and Recommendations on the Review of JFD Electronics/Channel Master Site* dated June 9, 2016 from Scientific Support Section's review of various site investigation documents. AECOM responded to this letter on June 20, 2016.

Activities Planned for July through September 2016

- The current schedule for various tasks is summarized below:

Task Description	Planned Schedule (as of 7/6/16)
Monthly O&M	July 2016
Prepare April 2016 Semi-Annual Groundwater Report	July 2016
Meet with EPA and its contractor (Black and Veach) for the Cristex site investigation to discuss management of the comingled plume	July/August 2016
Analyze groundwater from selected wells for 1,4 dioxane as part of the October 2016 semi-annual groundwater monitoring event	October 2016
Complete capture zone modeling	June/July 2016
Risk evaluation of free-cyanide and hexavalent chromium in sludge drying bed areas	July/August 2016
Evaluation of Existing Remedy and Potential Modifications	July/August 2016
Summary Report of Work Plan Implementation	August/September 2016
