RE: GSK South Campus, North Complex Second Annual Assessment Report

Brian,

The Hazardous Waste Section has received an electronic copy of the *Second Annual Assessment Report April 2015 – March 2016 Reporting Period* for the GlaxoSmithKline (NCD 052 547 635) in Research Triangle Park, North Carolina.

Thanks,
Rob McDaniel

Subject: GSK South Campus, North Complex Second Annual Assessment Report

Rob,

The Groundwater Remediation Permit issued by the NCDEQ Division of Water Resources (DWR) for operation of the extraction and injection system at the GlaxoSmithKline (GSK) South Campus, North Complex expires in December of 2016. On-behalf of GSK, Golder submitted a permit renewal and the Second Annual Assessment Report for the April 2015 to March 2016 reporting period to DWR on June 29, 2016. The report included several recommendations for improvements to the remediation system. You can access an electronic copy of the report and permit renewal using the following FTP Site. Please contact Lindsey Walata at GSK, (919) 483-4640, or me at (336) 852-4903, if you have any questions.

Thank you,

Brian Eichlin
