Re: Request for Proposal  
7946RA-3C  
Fairview Landfill  
Buncombe County, NC  
ID # NCD980557946

Dear Mr. Colone:

Submit a task work plan and cost estimate for remedial activities that will mitigate risks identified at the above referenced site. Conduct these activities in accordance with State Contract No. N13004S.

### **Task Order 7946RA-3C**

#### **Borrow Materials**

Identify the most economical source of cover soil for the Site. If needed, a cost analysis may determine that soil amendment is an option for a borrow source location.

- Soil sampling frequency will be determined by the location of the source area. A quarry is generally considered to be pristine while structural fill from urban development is not.
- Collect GPS coordinates at sampling points for reference. Report coordinates in decimal degrees to the seventh order using the North American Datum of 1983 (NAD83) format. These coordinates will be tabulated and included as an appendix.
- Submit samples to a North Carolina-certified laboratory and analyze for the following parameters by the most current U.S. EPA Contract Laboratory Program Target Compound List: volatile organic compounds by SW-846 method 8260, 1,4-dioxane by Method 8260SIM, semi-volatile organic compounds by SW-846 method 8270, 14 metals by SW-846 method 6020, and mercury by method 7471. Please note that any alternate method should be the U.S. EPA Method having the lowest detection limit and meets the Site's soil remediation goals.
- Submit a letter report that summarizes this activity with text, tables, and figures, as needed.

#### **Landfill Gas Probe/Water Supply Well Abandonment**

In preparation for construction activities, properly abandon landfill gas probes GP-01, GP-02, and GP-03, and the unused water supply well located at 333 Hollywood-A using a licensed North

Carolina driller. Submit a letter report documenting abandonment activities with text, tables, figures, and abandonment logs as needed.

Provide the work plan and cost proposal by August 15, 2016. A task authorization to begin work will be issued based on the approved proposal. Do not proceed with tasks prior to receiving this authorization. If you have any questions or concerns, contact me at (919)707-8340.

Sincerely,

A handwritten signature in black ink that reads "Matthew Aufman". The signature is written in a cursive style with a large initial "M".

Matt Aufman, Engineer
