Subject: Question Regarding Potential Construction/Excavation Along Back of Property => Former Heatcraft Remediation Site

Good afternoon, Steve.

I hope you are well.

As you may or may not know, potential human health exposures were evaluated in April 2011. I am revising the April 2011 document with recently collected information/data to ensure that all concerned parties have a clear and concise understanding of any potential risks to human health.

As part of this evaluation, I want to confirm that you do not have any construction activities currently scheduled that will require excavation along the back of your property. Specifically, in the west-northwest corner of your property.

Although re-evaluating potential human health exposures is routine, I want to remind you that you can contact me at any time with questions or concerns regarding your property.

Thank you in advance.
