10. Will this facility be a temporary holding site or is material processed on-site? Temporary Holding Site Processed on-site

11. If this is a temporary holding site, list the name(s) of the facility (or facilities) where the material will be taken to:

11. Describe the composting process to be used:

The description of the compost process must minimally include formation of windrows or annual turning of leaves (i.e. passive composting). Temperatures must be monitored daily to maintain a temperature of at least 131°F. If additional processing is done, explain briefly (e.g. usage of tub grinder, monthly aeration, etc.)

Windrow composting is placed in long windrows and the material is turned periodically to accelerate the composting process and provide uniform compost. An open space is left between each windrow to allow room for turning equipment.
 Leaves are placed in windrows, temperatures are monitored constantly and turned as often as needed
 If additional processing is done, it is done by tub grinders

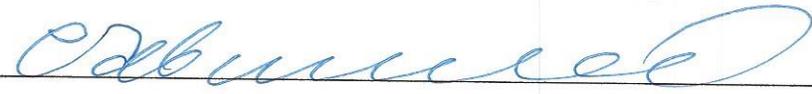

11. Describe the mulching process to be used:

The description of the mulching process must minimally include a description of the process, usage of a tub grinder, etc. If you checked anything under the yard trash category, you must either compost or sell the mulched product for boiler fuel.

Mulching process is done by tub grinder, the end results are sold as boiler fuel to local plants

REMINDER: This notification is not complete until the aerial photograph is received. E-mail the aerial photograph of the site to michelle.sclafani@ncdenr.gov

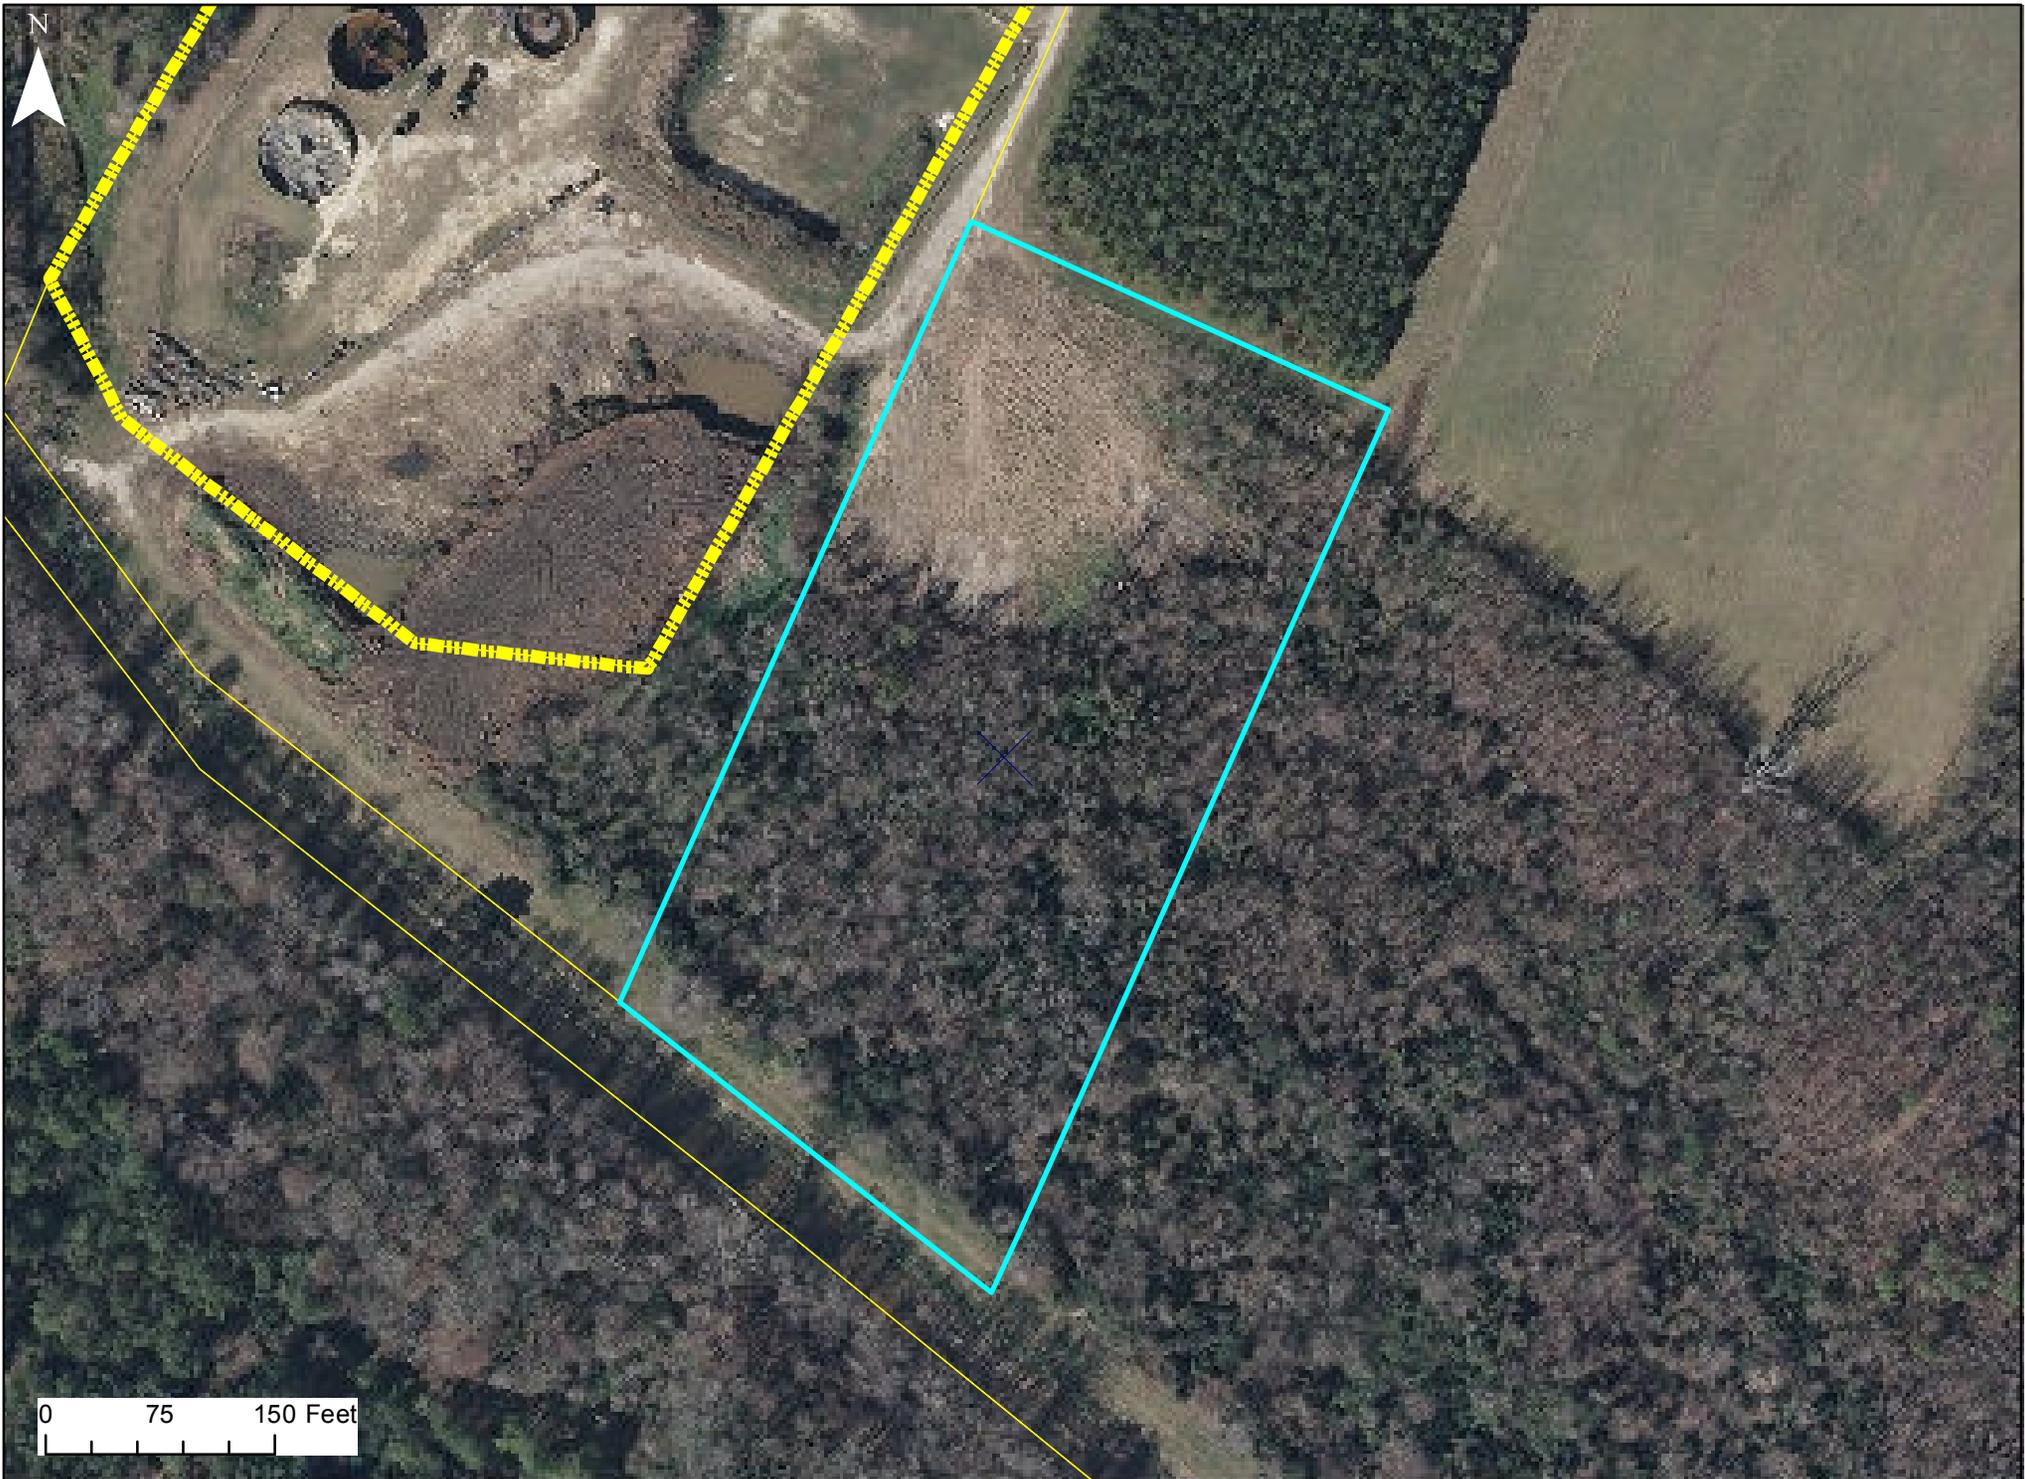

CERTIFICATION: To the best of my knowledge and belief, I certify the information provided in this notification is true, accurate, and complete. Furthermore, the facility will comply with the operational and setback requirements of Small Type 1 Compost (yard waste) facilities as outlined in .1406 and .1404(a)(1)-(10) of the Solid Waste Compost Rules.
