Mary

After our last communication I inquired to determine if NHC staff could create signs for us & learned that he cannot, but offered to get price for us from a vendor. Matt created signage I earlier shared with you, but advised that he cannot do images/symbols, apparently only alpha numeric characters. Coincidentally, I just received estimate from him (see attachment). Also, last week I explored while driving the neighborhood on Sunnyvale. What I observed was heavy undergrowth & established tree line in the backyards of the residences closest to the property. My immediate thoughts were where would we place signage that would be visible. Meanwhile, Cathy Timpy asked

Deputy Co Attorney about posting signage & his direction was that we would have to have permission or “right-of-entry”. Looking at NHC Co GIS maps, it appears the Daikin property under single ownership continues behind the residences of interest with apparently the drainage feature separating Daikin from those residential properties (see 2nd attachment). I do not have funds to purchase any signs until next budget year (July) & even then I would have difficulty justifying spending nearly \$200.00 for signs/posts when NHC Co staff (Matt) could make signs similar to that used elsewhere with minimal cost & no impact to health dept budget.

Hi Dianne – I wanted to take a minute to follow up on my email from June 16th. I wanted to make sure that you are not waiting on anything from us. I also wanted to get some idea as to when the signs will be posted. Thank you in advance for your assistance.

If I understand correctly, you and your team are opting for Number 1 (attached for the benefit of the cc list). We would add "No Swimming" and use "ATTENTION" as opposed to either "CAUTION" or "DANGER."

That sounds great. When can the signage be posted? Can I do anything to help you?

Mary – I have sent this for comments from Deputy Health Director & Health Director; the consensus is to go with option #1 but use the word "Attention" instead of "Caution".

I believe that would work. I was most concerned with CAUTION and worried it would lead to persons overreacting.

#1 is more specific. Can we use this one and replace caution with attention?

Dave,

This is related to a conference call Dianne had with the Office of Environmental Epidemiology Branch (OEEB) in May. Below they have their suggested signs. Dianne and I prefer suggestion #2. Please provide input. OEEB wishes to have a conference call to follow-up.

Thanks, Joshua

Dear Dianne:

I want to thank you for your patience in awaiting our comments on the signage you proposed in an email dated June 1, 2016. For your convenience, I pasted your proposed language below.

<image001.png>

As you may recall, we were unable to respond on June 1 to the language you proposed because our risk communicator was unexpectedly called out of the country. She has since returned and has the following two suggestions for your consideration.

SUGGESTION NUMBER ONE:

She would add "NO SWIMMING."
She prefers "DANGER" to "ATTENTION."

<image003.png>

SUGGESTION NUMBER TWO:

Attention Polluted Water Avoid Contact with These Waters

After you have had the opportunity to review our suggestions, we can schedule a conference call to discuss the language. I am available all week. Thank you.
