Charlottesville, VA 2290-1618

Subject: *Annual Post-Closure Groundwater Monitoring Report - June 2016 Sampling Event*
Transcontinental Gas Pipe Line Station 150
 Mooresville, North Carolina
EPA ID Number: NCD 981 863 012

Dear Mr. Lutz:

The Hazardous Waste Section (Section) has reviewed the above referenced report. This report presents groundwater monitoring data that is being collected at nine-month intervals for a 27-month period. It is the Section's understanding that Transcontinental Gas Pipe Line may petition for a change in monitoring frequency after 27 months.

The only constituents to exceed 15A NCAC Subtitle 2L Groundwater Standards are total iron and total manganese. This is consistent with historic monitoring events and the Section does not have any additional comments at this time.

If you have any questions or comments, please do not hesitate to contact me at 919-707-8208 or via email at mary.siedlecki@ncdenr.gov.

Sincerely,

Mary Siedlecki

Mary Siedlecki, Project Manager
