**Subject:** Followup to September 2015 Soil Sampling Results

Robin, Jeff,

Attached is a letter and attached report from our consultant Ensafecom in follow-up to the recent soil sampling results dealing with the depleted electrolyte solution releases earlier this year. Please contact me to discuss this matter after your review of the attached information.

Jim Harris is on vacation this week. I'm not sure if he was able to reach you last week to request an extension to respond to your letter addressing matters related to the more recent event at the cell house. We'd like to have a 30 day extension to respond to Ms. Woosley's letter and provide you with information on that matter. We are meeting with Ensafecom at the Mooresboro plant this week to develop an approach to this matter. Following our meeting, we will work with Ensafecom to develop a plan for addressing future actions in the subject area.

I look forward to hearing from you on these matters. My contact information is located below.

Thank you,  
Tim
