Re: Request for Notification Extension
Permit No.: 1809-INDUS
Marshall Steam Station
Catawba County
Terrell, North Carolina 28682

Dear Mr. Frost,

On October 19, 2015, Duke Energy notified the Division that the final placement of coal combustion product occurred at the Marshall Steam Station FGD Landfill (Permit No. 1809-INDUS). With that notification Duke Energy requested deference of closure activities. In a response from the Division dated October 20, 2015, Duke received approval to defer closure activities and a list of expectations from the Division. This letter serves as a request for an extension of 6 months to the October 1, 2016 deadline to notify the Section of Duke Energy's determination on whether to expand the landfill or move towards closure.

As discussed via phone conversation on September 20, 2016, uncertainty remains in regards to final North Carolina Department of Environmental Quality (NCDEQ) ranking of the Marshall Steam Station ash basin. The FGD Landfill at Marshall Steam Station has about 100,000 cubic yards of air space remaining in Phase I in addition to Site Suitability for Phase II. Since ash basin ranking could affect the construction timing for future expansion of the Marshall Steam Station Industrial Landfill No. 1 (Permit No. 1812), Duke Energy would like to defer commitment of expansion or closure of the FGD Landfill until further evaluation and progress has been made towards satisfying requirements of the North Carolina General Statute 130A-309.213(d), added by House Bill 630.

Duke Energy intends to communicate progress of ash basin ranking and future Marshall Steam Station landfill needs with the Division no later than April 1, 2017.

Duke Energy is committed to environmental stewardship and cooperation with the Division regarding the operation, maintenance, safety, and integrity of all of its facilities. The FGD Landfill will continue to be properly maintained until a final decision is made. If there are any questions regarding this request, please contact me at (980) 373-5697.

Respectfully Submitted,

Tyler Hardin, EIT
