Re: Inactive Hazardous Waste Sites Priority List
Scotts Creek Battery
New Bern, Craven County

Dear Mr. Shamrock:

The site listed above has been included on the October 2005 Inactive Hazardous Waste Sites Priority List (Priority List) in accordance with North Carolina General Statutes Section 130A-310.2. The Priority List is a list of sites where uncontrolled disposal, spills, or releases of hazardous substances have been identified. A special priority system (North Carolina Administrative Code Title 15A Subchapter 13C Section 0.200) is used to rank the sites on this list in decreasing order of danger to public health and the environment.

This letter is being sent to you to fulfill our statutory duty to notify those who own and those who at present are known to be responsible for each site on the Priority List. A copy of the Priority List with each site's rank appearing in the right-hand column is attached. Please note this letter is simply a notice of the site's inclusion on the priority list and is not an order to conduct any work.

If a responsible party or owner wishes to voluntarily perform site cleanup, that party must enter into an agreement with the Branch to ensure Branch approval. Each voluntary remedial action will be overseen by Branch staff or, at the discretion of the Branch, by approved environmental consultants.

Those who are interested in reviewing the Superfund Section's files on any of these sites may contact Scott Ross at (919) 508-8475, to schedule an appointment. If you are interested in conducting a voluntary cleanup of your site, or if you have any questions, you may contact me at (919) 508-8460.

Sincerely,

Charlotte V. Jesneck, Head
Inactive Hazardous Site Branch

Dear Mr. Dover:

Enclosed you will find a copy of the inorganic chemical analysis performed on the well water of Mr. L. E. Tripp located at 404 Howell Road in Craven County. As you will recall, next door to this address was an old battery dump that was cleaned up with Superfund monies. I am suppose to collect and send to you copies of chemical analysès of Mr. Tripp's well water through 1989. This is the 1986 sample.

If I can be of any further service, please feel free to call.

Sincerely,

Ray G. Silverthorne, Jr., R.S.

INSTRUCTIONS

Using typewriter or ball point pen, fill in all requested information on the top portion of form front. Please print legibly if typewriter is not available.

SAMPLE COLLECTION

- 1) Remove the one 1-quart plastic container and inflate by mouth, if uninflated.
- 2) Let the water (to be sampled) run for 5 minutes to assure that the water is from the distribution system.
- 3) Rinse the plastic container two or three times, and discard the water.
- 4) After rinsing, fill the container to within approximately one inch of top of the sampling container. Then cap the container securely.

SAMPLE SHIPMENT:

- 1) After collection of the sample, place the one 1-quart sample into the cardboard box along with the report form, then seal.
- 2) Mail immediately to the State Laboratory using the supplied label.

RECOMMENDED LIMITS FOR DRINKING WATER ARE LISTED BELOW:
