SUBJECT: REMOVAL FROM EPA'S CERCLIS INVENTORY

FROM: Matthew J. Robbins, Brownfields Coordinator
Waste Management Division, Region IV

TO: TREND LINE FURNITURE CORP
W HOLLY ST
MAIDEN
NC 28650

EPA has identified the Brownfields Initiative as one of the Agency's top priorities. The term "brownfields" refers to previously used properties that may lie vacant because potential contamination makes them unmarketable to the private sector. EPA has recently announced a comprehensive Brownfields strategy, including Pilot grants to municipalities, to stimulate economic revitalization.

One part of the strategy has been for EPA to review its complete inventory of Superfund sites. These sites have been screened and determined to require no remedial action under the Federal Superfund Program based on information available as well as on conditions and policies that currently exist. This is to notify you that EPA has removed your facility from EPA's computer inventory known as CERCLIS. THIS DOES NOT INDICATE THAT THE STATE HAS MADE A SIMILAR DETERMINATION.

If you have any questions, please call me at 404/347-5059 ext. 6214.

Trend Line Furniture Corp., Conover, NC	NCD 081 332 991

Dear Mr. Spurling:

Grover Nicholson of the NC Superfund Section spoke with you today to notify you that the EPA Field Investigation Team (FIT) will conduct off-site reconnaissances of the subject sites located in Catawba County. The reconnaissances will be conducted on 16-19 October 1989 by Eric Corbin, Clifford Leonard, and Prince Goins of NUS Corporation.

The purpose of these reconnaissances is to determine if the sites pose hazards to public health or the environment because of potential releases of contaminants to soil, surface water, groundwater, or air. The investigation team will locate all nearby water supplies (surface and groundwater, community and private) and any close sensitive environments, schools, and day care centers.

These reconnaissances are not emergency situations but are normal steps in the evaluation of all uncontrolled and unregulated potential hazardous waste sites in North Carolina. You may want to have your representative meet with the investigation team. If so, please contact Eric Corbin at 1-800-888-7710 and he will coordinate a meeting. I am enclosing background data on the sites for your information.

Mr. Spuling
10-6-89
Page 2

If the reconnaissances indicate the need for future study of the sites, we will contact your office to advise. If you have any questions, please don't hesitate to call Grover Nicholson or me at (919) 733-2801.

Sincerely,

Lee Crosby, Head
Superfund Branch
Solid Waste Management Section

Subject: Scheduled FIT Reconnaissances in
 North Carolina

Dear Mr. Nicholson:

The EPA Field Investigation Team (FIT) will be visiting the state of North Carolina during October and November, 1989. FIT will be conducting offsite reconnaissances and gathering information to investigate the following sites:

Date	EPA ID No.	Site Name	County	FIT Project Mgr.
Oct. 16-19	NCD991279118	Meredith/Burda, Inc.	Catawba	Eric Corbin
	NCD044440642	Lane Company, Inc.	Catawba	Clifford Leonard
	NCD066304627	Premium Coatings, Inc.	Catawba	Clifford Leonard
	NCD003228087	S & W Chemicals, Inc.	Catawba	Prince Goins
	NCD105797922	Technibilt (Div. of Whittar)	Catawba	Eric Corbin
	NCD000648436	Trend Line Furniture Corp.	Catawba	Prince Goins
	NCD081332991	Trend Line Furniture Corp.	Catawba	Prince Goins
Nov. 1-3	NCD072012354	Singer Co. Furniture Division Washington	Beaufort	Bob Donaghue
	NCD003197704	Salt Wood Products	Craven	Bob Donaghue
	NCD072020399	Proctor & Gamble Paper Products Company	Pitt	Kenneth Sanders
	NCD075575191	Reed National Corp.	Pitt	Kenneth Sanders
	NCD003184249	Union Carbide Corp.	Pitt	Joan Dupont

These reconnaissance trips are in addition to the ones listed in my letter of September 18, 1989. Please notify the appropriate local agencies. I appreciate your help in this matter.

Very truly yours,

Joan J. Dupont

SUBJECT: Preliminary Assessment Report
Trend Line Furniture NC D000648436
West Holly Street
Maiden, NC 28650

Dear Ms. Bland:

Enclosed please find the Preliminary Assessment report for the subject site. This priority is based on review of available data.

The owner of Trend Line is Mohasco Corp., 57 Lyon Street, Amsterdam, NY 12010. Mohasco is primarily a carpet manufacturer.

The Trend Line Furniture Maiden plant was bought from Lawing Manufacturing in 1978. Lawing manufactured furniture at this plant from the early 1950's until 1978. Trend Line closed this plant in the spring of 1984 and now uses this space only for a warehouse. During its years of operation the Maiden plant produced "case goods" such as cabinets and dressers.

Sawdust generated at this plant was sold to make fiberboard. A varnish and stain sludge was also generated from the water pan spray booths. This was determined to be non-hazardous and was therefore disposed of in the county landfill until about 1977. A change in the stains and lacquers used produced a more liquid sludge that the county landfill would no longer accept. For this reason the sludge was incinerated by Caldwell Systems in Lenoir for the last several years that the plant operated. Before disposal the sludge was stored in drums in the finishing room. This plant was classified as small generator.

There are no wells at the Trend Line plant in Maiden. The plant has always had city water and sewer. The only sewage pretreatment was skimming to remove the varnish sludge.

Ms. Denise Bland
Page 2

There are no records of spills or disposal of hazardous wastes on this site in the past. Due to the age of the facility and the possibility of unreported spills or disposal on the site in the past, a low priority is assigned to this site.

On 19 December 1985, this Preliminary Assessment was reviewed by CERCLA Unit personnel and by the following representatives from the North Carolina Department of Natural Resources and Community Development, Division of Environmental Management: Fay Sweat, Groundwater Section and Glen Ross, Air Quality Section.

If you have any questions, please call me at (919) 733-2178.

Sincerely,

Jack Butler, Environmental Engineer
Solid and Hazardous Waste Management Branch
Environmental Health Section

SUBJECT: Telephone conversation with Danny Waugh [(704) 464-4051] about the Trend Line Furniture Plants in Conover (NC D081332991) and Maiden (NC D000648436).

Danny Waugh of the Trend Line plant in Lincolnton was contacted on this date to obtain information on the Trend Line plants in Conover and Maiden. The owner of Trend Line is Mohasco Corp., 57 Lyon Street, Amsterdam, NY 12010. Mohasco is primarily a carpet manufacturer. The contact person at Mohasco is Bill Bundy at (518) 814-2653.

The Maiden plant was bought from Lawing Manufacturing in 1978. Lawing manufactured furniture at this plant from the early 1950's until 1978. Trend Line closed this plant in the spring on 1984 and now uses this space only for a warehouse.

The Conover plant began operation in 1962. Mr. Waugh reported that he thought that this site was vacant land before 1962.

The Maiden plant produced "case goods" such as cabinets and dressers, and the Conover plant produces primarily upholstered furniture such as chairs and sofas.

Sawdust generated from both these plants is sold to Broyhill to make fiberboard. A varnish sludge is also generated from the water pan spray booths. This has been determined to be non-hazardous and is therefore disposed of in the Caldwell County landfill. Before disposal the sludge is stored in drums in the finishing room.

Neither plant has any wells and each are served by city water and sewer. The only pretreatment is skimming to remove the varnish sludge. Mr. Waugh knew of no past spills or disposals of hazardous wastes at the Maiden or Conover plant.

P. O. Box 2091
Raleigh, North Carolina 27602

Re: EPA Identification No. NCD066325416

Dear Mr. Strickland:

On July 25, 1980, Trend Line Furniture Corporation notified Region IV of the EPA that its manufacturing facility located at Maiden, North Carolina, generated, treated and stored toxic waste. A copy of that notification is attached hereto as Exhibit A. Subsequent testing has proven that this notification was unnecessary and Trend Line is hereby notifying your office of a clarification in its RCRA status.

At Maiden, Trend Line is engaged in the manufacture of several styles of wood furniture (i.e., case goods). These styles are finished by a variety of conventional wood finishes. Coatings are applied in spray booths which utilize a water-pan system to collect excess coatings. The excess coatings collected accumulate in the water and form a sludge. This sludge is drained regularly from the water pans to a central holding tank which is heated to reduce the sludge volume by evaporating some of the water content. After completion of the evaporation process, the reduced sludge is removed and stored in barrels.

The coatings used by the Maiden facility contain several of the non-halogenated solvents listed as either F003 or F005 in 40 CFR §261.30. Some of the spent non-halogenated solvents escape during the coating process and the remainder evaporate during the water reduction treatment in the central holding tank. When

Mr. O. W. Strickland

the reduced sludge is removed from the central holding tank, no F003 or F005 spent non-halogenated solvents remain.

Careful monitoring over the past months has determined that the Maiden facility produces considerably less than 1,000 kilograms per month of the sludge mixture containing F003 and F005 non-halogenated solvents. Therefore, the Maiden facility qualifies as a small quantity generator pursuant to 40 CFR §261.5 and is exempt from regulation under 40 CFR 122, 123, 124, 262, 263, 264, 265 and the notification requirements of §3010 of RCRA.

The sludge remaining after evaporation treatment at Trend Line's Maiden facility is chemically and physically identical to the sludge generated at Trend Line's Conover facility because both facilities utilize the same coatings and treatment methods. The sludge at Trend Line's Conover facility has been analyzed by J. L. Rogers and Callcott Engineers, Inc. of Greenville, South Carolina, and found to contain no contaminants in violation of the EP toxicity maximums shown in Table I of 40 CFR §261.24 and a flashpoint greater than 150°F. A copy of that independent analysis is attached hereto and was the subject of my letter to you on May 5, 1981 regarding Trend Line's Conover facility. For the reasons above, Trend Line has decided to dispose of this reduced sludge in the Catawba County Landfill which is permitted by the State of North Carolina under Permit No. 18-01.

If you disagree with the analysis and course of conduct herein set forth, please contact me as soon as possible.

Sincerely,

George W. House
Environmental Counsel
Trend Line Furniture Corporation

U.S. ENVIRONMENTAL PROTECTION AGENCY
NOTIFICATION OF HAZARDOUS WASTE ACTIVITY

INSTRUCTIONS: If you received a preprinted label, affix it in the space at left. If any of the information on the label is incorrect, draw a line through it and supply the correct information in the appropriate section below. If the label is complete and correct, leave Items I, II, and III below blank. If you did not receive a preprinted label, complete all items. "Installation" means a single site where hazardous waste is generated, treated, stored and/or disposed of, or a transporter's principal place of business. Please refer to the INSTRUCTIONS FOR FILING NOTIFICATION before completing this form. The information requested herein is required by law (Section 3010 of the Resource Conservation and Recovery Act).
