**RE: October 2012 Quarterly Status Report  
Former Eaton Corporation Facility  
1100 East Preston Street  
Selma, NC  
NCDENR Site ID No. NONCD 0002853  
Solutions-IES Project No. 2012.0009.EATN**

Dear Mr. Caulk,

Solutions-IES, Inc. (Solutions-IES), on behalf of Eaton Corporation (Eaton), has prepared this Quarterly Status Report for the former Eaton facility located at 1100 East Preston Street in Selma, NC. This site was accepted into the Registered Environmental Consultant program on February 10, 2009. The Remedial Investigation Work Plan (RI WP) dated February 17, 2009, was certified by the Registered Site Manager (RSM) and submitted to NCDENR. Two RI WP amendments were subsequently submitted dated June 25, 2010 and January 4, 2011. The RI Report dated February 8, 2012, was certified by the RSM on February 9, 2012.

Solutions-IES is currently planning a pre-design investigation. The investigation will consist of three activities:

1. Installation of two trenches to enable direct observation of conditions/locations of the sanitary and storm sewers along the northern portion of the site.
2. Soil borings to further evaluate contaminant concentrations at various depths at several locations on site.
3. A small test of the effectiveness of an emulsified vegetable oil/colloidal buffer substrate applied to the bottom of the open trenches to initiate anaerobic reductive dechlorination in the shallow groundwater zone.

The pre-design investigation findings will be presented in a Pre-Construction Report, or included with the Remedial Action Plan. Work is progressing in a manner to achieve the mandatory work phase completion deadlines specified in the Administrative Agreement and 15A NCAC 13C .0302(h).

If you have any questions or need any additional information, please feel free to contact me at (919) 873-1060.

Yours truly,  
**Solutions-IES**
