Subject: instructions for accessing CARA/Documentum

Teresa,
The Superfund Section has moved to digitized storage of project files which are available to the public through an on-line portal called CARA/Documentum. Site files are located on the CARA/Documentum Storage system which can be accessed using the following instructions: http://portal.ncdenr.org/c/document_library/get_file?uuid=ad727cf9-9dd9-4658-83bc-cfbb488abd6f&groupId=38361. By the way, CARA/Documentum may be directly accessed here: <https://edm.nc.gov/DENR-Portal/>.

Some of the Superfund Section's site records are only available at this time in paper format in the Division's Central Office in the Green Square Building in Raleigh. If you wish to check on the availability of file records for a site where those file records may be solely housed in the Division's Central Office at Green Square rather than in electronic format on the CARA portal, please refer to the following link for a description on accessing hard copy files: <http://deq.nc.gov/about/divisions/waste-management/superfund-section/sf-file-records>.

To assist you with your current and future investigations, please note that a list of active sites in the IHSB inventory, including site addresses, can be found at the following webpage: <http://deq.nc.gov/about/divisions/waste-management/superfund-section/inactive->

hazardous-sites-program. You may also wish to engage the services of a company that compiles environmental reports from multiple public records databases. Some commonly used example companies include EDR (Environmental Data Resources, Inc.) or First Search. You may also find the Division of Waste Management's Geographic Information Systems (GIS) Interactive Map pages helpful in searching for sites regulated under various agencies. The Division's Interactive GIS Map pages can be found here: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/waste-management-gis-maps>.

By the way, nearby Dry-cleaning Solvent Cleanup Act (DSCA) Program sites may be viewed here: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/waste-management-gis-maps/dsca-map-viewer>.

Nearby Hazardous Waste Sites may be viewed here: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/waste-management-gis-maps/tsd-map-viewer>.

Nearby Inactive Hazardous Sites may be viewed here: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/waste-management-gis-maps/ihs-map-viewer>.

Nearby Pre-Regulatory Landfills may be viewed here: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/waste-management-gis-maps/pre-regulatory-landfills-map>.

Nearby Brownfields Sites and Boundaries may be viewed

here: <https://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/waste-management-gis-maps/brownfields-sites-and-boundaries>.

You may download GIS Layers from here to see other regulated

sites: <http://deq.nc.gov/about/divisions/waste-management/waste-management-rules-data/waste-management-gis-maps>.

Alternatively, you may see Regional Underground Storage Tank (RUST) Incidents

here: <http://ncdenr.maps.arcgis.com/apps/webappviewer/index.html?id=cc343d36bc3e4da2a847e967fa5a6eae>.

I hope you find this information helpful.

Sincerest Regards,

David

Re: **Travis Knits, Inc.**
1515 West Academy Street
Cherryville, Gaston County, North Carolina
NONCD0002787

Dear Mr. Sturges:

The Inactive Hazardous Sites Branch (IHSB) of the North Carolina Division of Waste Management (Division) has received reports of assessment activities including the August 20, 2015 Phase II Environmental Site Assessment (ESA) by Blue Ridge Environmental Services, Inc., and the December 8, 2015 Sub-Slab/Indoor Air Assessment and March 15, 2016 Soil & Groundwater Assessment Report by Hart & Hickman, PC that indicate environmental media (soil, groundwater, and air) at the above referenced location have been contaminated by one or more hazardous substances. As a result of the contamination, the 1987 Inactive Hazardous Sites Response Act (IHSRA), codified under North Carolina General Statute (NCGS) § 130A-310, *et seq.*, and Title 15A of Subchapter 2L of the North Carolina Administrative Code (15A NCAC 2L) apply to the Travis Knits Site (or Site).

On January 19, 2016, the IHSB submitted a "Notice of Request for Remedial Investigation" to James (Jim) Sitterly of Mohican Mills, Inc. (Mohican Mills). The request stated that based on the reported concentrations of contaminants detected in the groundwater and the proximity of active water-supply wells and residential properties, the Division considers Travis Knits to be a high priority for assessment.

On February 18, 2016, we received correspondence from Susan Cooper of Womble Carlyle Sandridge & Rice, LLP (WCSR) responding to the IHSB's January 19, 2016 Notice of Request for Remedial Investigation (RI) of Travis Knits, Inc. (Travis Knits). The letter states that WCSR represents Mohican Mills and Fab Industries Corp (its parent company), and, for reasons stated in the letter, Mohican Mills cannot commit to conduct a full investigation of the contamination at the Site.

We reviewed the information in the letter. Based on this review and correspondence and information within Division records, these are our understandings of the facts:

- 1) On November 11, 1970, Lemag, Inc. (Lemag) purchased a 10-acre parcel of land (subject property) at 1515 West Academy Street in Cherryville, Gaston County. On December 1, 1970, Lemag leased the property to Knitronic Knitting Mills, Inc. (Knitronic). In 1971, construction of the industrial and chemical storage structures was completed at the subject property.
- 2) On December 27, 1976, Knitronic and Harbor Knits merged, and on July 14, 1978, Knitronic changed its name to Travis Knits. On or about September 20, 1979, Fab Industries Corp (Fab Industries, f/k/a Fab Industries Trust, f/k/a Fab Industries, Inc.) purchased Travis Knits, and facility operations resumed at the subject property.
- 3) Travis Knits submitted a written request to the NCDAQ on October 18, 1979 to transfer the facility air permit (03489R) from Knitronic to Travis Knits (i.e., appears as the same entity). The permit granted permission for the operation of two tenter frames that processing prescoured fabrics and an air cleaning device that consisted of a carbon bed adsorber installed on the prescouring/dry cleaning system to remove hydrocarbon and odorous emissions.
- 4) Lemag and Travis Knits modify the subject property lease on December 17, 1979. On December 15, 1981, Mohican Mills (f/k/a Meyer Mills, Inc.), a principal subsidiary of Fab Industries, purchased the subject property from Lemag.
- 5) Correspondence on January 15, 2016 from Susan Cooper of WCSR to the IHSB confirmed the use of tetrachloroethene (PCE) in the facility operations. Randy Littlejohn recalled that PCE was used in washer equipment to clean yarn dye materials prior to his employment in March 1980. In addition, on November 20, 2015, Dawn Gottschalk reported that a PCE release occurred from a leaking tank at the subject property in the 1980s.
- 6) On September 4, 1991, Travis Knits purchased the subject property (approximately 10-acres) from Mohican Mills and the east adjacent parcel (approximately 4 ½-acres) from William & Marjorie Andrews. On September 29, 1992, Travis Knits acquired approximately 2 acres of the west adjacent parcel owned by Jakbee, Inc. Both Travis Knits and Mohican Mills continued as subsidiaries of Fab Industries.
- 7) NCDAQ directed Travis Knits to provide a facility-wide emissions inventory within one year of the issuance of the September 9, 1993 Air Quality Permit #3489R9. Trigon Engineering Consultants, Inc.'s (Trigon's) August 1994 Air Toxics Modeling of Travis Knits stated that "the Travis Knits 1993 Air Pollutant emissions report identified formaldehyde, acetic acid, xylene, perchloroethylene [a/k/a PCE], ethyl acetate, arsenic, beryllium, cadmium, hexavalent chromium, manganese, mercury, and nickel emissions from plant process and fuel combustion."
- 8) In 1994, Trigon reported the PCE air pollution by source included tenter frames, dyeing processes, and fugitive emissions. The May 25, 1995 Air Permit # 3489R10 for Travis Knits incorporated emission limitations on toxic air pollutants including PCE.
- 9) Facility operations at Travis Knits ceased on June 29, 2001, and on November 3, 2003, Travis Knits was merged into Mohican Mills (i.e., the two subsidiaries combined under the parent company, Fab Industries). SSJJJ Manufacturing, LLC (SSJJJ) signed an agreement to purchase assets of Fab Industries on May 26, 2005. Subsequently, Fab Industries created a liquidating trust, Fab Industries Trust, as a successor.

William Sturges
April 11, 2016
Page 3 of 3

10) On November 1, 2005, Fab Industries filed a certificate of amendment to change its name to Fab Industries Corp. On November 2, 2005, Fab Industries Trust (the successor to Fab Industries) announced it had closed a definitive agreement for the sale of assets and assumption of liabilities to SSJJJ and that business operations would continue under the name Fab Industries Corp.

Thus Mohican Mills (having merged with Travis Knits) is the same and sole operator of the facility and that facility operations conducted by Mohican Mills (a/k/a Travis Knits, a/k/a Knitronics) is the only operator that could have caused or contributed to contamination of environmental media at the subject property. Based on these understandings, we believe that both Mohican Mills and Fab Industries have responsibilities pursuant to NCGS § 130A-310.7 of the IHSRA.

We appreciate your efforts to address the contamination through sampling of some water-supply wells within the immediate vicinity of the subject property. However, the Site has not been properly characterized and the lateral and vertical extent of contamination remains undefined. Further assessment activities are required to adequately investigate immediate exposure risks of contaminants from this Site. Moreover, to protect public health and the environment, the Division has the authority under § NCGS 130A-310.1(c) to order any responsible party to conduct such monitoring, testing, analyses and reporting as deemed reasonable and necessary to ascertain the nature and extent of any hazard posed by a site.

We request that you prepare a work plan that complies with the items outlined in our January 18, 2016 Notice of Request for Remedial Investigation. Please submit the work plan to us by May 26, 2016.

Your prompt attention to this matter is appropriate. If you have questions, need more information, or require additional time to complete this request, please contact me at (704) 663-1699 or Collin Day at (336) 776-9675.

Sincerely,

/s/ *George Adams*

Hi George, thank you for your email, particularly given that you are on leave – we hope you have a good recovery.

Dawn Gottschalk is with an insurance company and we provided to her the exact same documents and information we provided to you. We do not know about a particular PCE release from a tank in the 1980s as your letter indicated Ms. Gottschalk spoke of. I'll send you a response to your letter shortly and address this further. Take care, Susan

Susan,

I apologize for the delay in responding to your email. I had surgery last Friday and I opted to take my laptop home with me and try to keep up with work while I am convalescing. After this morning, I may decide to reevaluate the wisdom of that decision.

If I recall correctly, Dawn contacted me last fall and had questions including...did NC have a hazardous waste trustfund to assist in cleanup of Sites? At first I thought she was saying PCB, I believe she had me on speaker phone, and that she may be asking about the commercial UST trust fund. So I wasn't sure how to answer her questions because TSCA could apply and I don't work with the commercial trustfund. But then she connected clearly, and told me that she was working to complete an insurance claim with your client for a PCE release from a tank at 1515 West Academy. She said she knew both you and Jim and she seem to have specific facility information. Does this sound right to you?

In any event, it is imperative that any records for this facility that may exist are shared with us as soon as possible, so that we have the most complete understanding of this Site as we move forward. Even if they records are not within control or possession of you or your client, please share any knowledge of such records or other information sources so that I may solicit copies as I did with DAQ.

Please let me know if you more questions or need information, and again, thank you for your patience. – George

DIVISION OF WASTE MANAGEMENT

SUPERFUND SECTION

INACTIVE HAZARDOUS SITES BRANCH

MOORESVILLE REGIONAL OFFICE

CALL TO: 704-350-7500 - Western District of North Carolina

CALL FROM: George Adams -

DATE/TIME: 3-24-16 - 1550

RE: History of BK - Travis Knits - WNC -

TELEPHONE LOG:

1550 → I spoke to Ashley - she searched her database and could not find a BK case for Travis Knits - I indicated it would have been in Oct 79 or before - She said that they did have public records but if not in her database - likely would not have - transfer me to Dave → supervisor

1555 → I left a message for Dave and explained I was looking for a BK case involving Harbor Knits, Knitronic, or Travis Knits or before the beginning of Oct 79 -

1620 - He called back and said he could not find a case in the ECF for Travis Knits - asked about the other two - gave him harbor knits - Knitronic - could not find a case for those - I asked about the online pre 1992 case query - I can see Knitronic but no other - and no BK

George Adams

North Carolina Department of Environment & Natural Resources

Division of Waste Management - Superfund Section - Inactive Hazardous Sites Branch

610 East Center Avenue, Suite 301

Mooresville, North Carolina 28115

Phone: (704) 663-1699

Fax: (704) 663-6040

Print cases were misrouted over to ECF - not received to file in district w/ HQ - document retention only 15 yrs - are public docs but if not in ECF - would not be on microfiche.

CM/ECF Information

Case Management/ Electronic Case Filing System (CM/ECF)

Case Management/Electronic Case Files (CM/ECF) is the automated case management and electronic docketing system used by the U.S. District Court for the Western District of North Carolina. CM/ECF provides an easy-to-use electronic case filing feature that will allow you to file and view court documents over the Internet. CM/ECF allows attorneys to file and view documents from their office, home or anywhere they have access to the Internet, 24 hours a day. Documents are automatically docketed as part of the filing process and are immediately available electronically.

Public Access to Court Electronic Records (PACER)

Public Access to Court Electronic Records (PACER) is an electronic public access service that allows users to obtain case and docket information from federal appellate, district and bankruptcy courts, and the PACER Case Locator via the Internet. PACER is provided by the federal Judiciary in keeping with its commitment to providing public access to court information via a centralized service.

How Do I Access PACER?

First, you will need a PACER account.

Sign up for one using our convenient on-line registration process. [Sign Up Here »](#)

Each court maintains its case information locally. Click here to access the [Western District of North Carolina Document Filing System](#).

If you do not know where the case is filed, use the [PACER Case Locator](#).
