Re: VFW Road Contamination
Reidsville, Rockingham County, NC
NONCD0002894

1001 NE Market Street Extension, Reidsville, NC ("Site")
Response to Request by Division of Waste Management ("DWM") to Conduct Remedial
Investigation dated September 4, 2012

Dear Ms. Robbins:

This firm represents Plastic Omnium Automotive Services, Inc. f/k/a Plastic Omnium Zarn, Inc. ("Zarn") with regard to the September 4, 2012 request of the DWM that owners and operators of the Site conduct a remedial investigation of the VFW Road Contamination due to levels of dieldrin and iron that exceed 2L standards. DWM has made that request based upon a history of limited releases at the Site which were addressed under the oversight of the North Carolina Department of Environment and Natural Resources ("DENR") Division of Waste Management, UST Section and ultimately received determinations of no further action.

In connection with that representation, we have conducted a thorough review of all materials in the DWM file that have been posted on the internet for public access, and have also reviewed other materials in the possession of DWM and others; interviewed and obtained an affidavit from a person with first-hand knowledge of historic operations at the Site; and engaged an independent consultant, Shield Engineering, Inc., to evaluate certain conditions within the area of the Site and where the VFW Road Contamination is located. For the reasons that follow, based upon the facts currently before us we conclude that no owner and operator of the Site is a responsible party, as that term is defined at NCGS § 130A-310.7, for the VFW Road Contamination, and consequently at this time no Site owner or operator is willing to voluntarily assume a remedial investigation of the VFW Road Contamination. As a service to DWM, however, we have identified likely sources of what appear to be at least two separate releases that constitute the VFW Road Contamination as defined by DWM.

3171666v3 08725.01011

Area Conditions: Hydrology, VFW Road Contamination

The VFW Road wells are located to the east of the Site at distances from the Site that range between 300 and over 1000 feet. The Site is separated from the VFW Road residential wells by a 60 foot deep valley, with the Site on the elevation to the east and the VFW Road residences on the elevation to the west. Groundwater from the area of the VFW Road Contamination is imputed to flow westward, toward the Site. Smith Automotive, an automotive repair shop, is located upgradient of the VFW Road Contamination, as is the former American Tobacco Stemmyery. Land historically cultivated for crops is located between the Site and immediately adjacent to that portion of the VFW Road Contamination where pesticides have been detected.

We understand from materials in the files of DWM that the VFW Road Contamination is as follows:

Pesticides

Constituent	VFW Road Address	Approximate Distance from Site (feet)	Highest Detection (ug/l)	2L Standard (ug/l)
dieldrin	322	900	0.63	0.002
endosulfan	322, 328	900	0.0037	40
Endrin (includes endrin, endrin aldehyde and endrin ketone)	322	900	0.0087	2
Endrin ketone	322	900	0.0043	NE
Alpha-chlordane	322	900	0.0021	0.1
methoxychlor	328	900	0.0053	40

Volatile Organic Compounds

Constituent	VFW Road Address	Approximate Distance from Site (feet)	Highest Detection (ug/l)	2L Standard (ug/l)
1,1 DCE	171	900	4.5	7
1,1,1 TCA	171	900	0.36	200
MTBE	246	300	0.89	20
Chloroform	287	1000	3.2	70

Metals

Constituent	VFW Road Address	Approximate Distance from Site (feet)	Highest Detection (ug/l)	2L Standard (ug/l)
Arsenic	215	1000	4.7	10
Copper	215	1000	180	1000
Chromium	215	1000	100	10
Iron	144	900	4000	300
Barium	144	900	42	700
Lead	215	1000	7.8	15
Manganese	144	900	65	50
Magnesium	212	700	9800	NE
Nickel	215	1000	19	100
Silver	215	1000	1.8	20
Zinc	215	1000	160	1000

NE = not established

The wells impacted by pesticides are approximately 900 feet east-south-east of the Site. The wells impacted by volatile organic compounds are in an arc arranged approximately 500 to 1600 feet north of the pesticide impacted wells and between 300 to 1000 feet north east of the Site. This physical arrangement indicates the source of the pesticides differs from that of the volatile organic compounds.

Dieldrin is the only non-naturally occurring substance that exceeds the 2L standard. Iron and manganese were detected in one well, and chromium in another, each exceeding 2L standards. These are naturally occurring substances. The levels of iron, manganese and chromium detected at VFW Road are well within the range of levels known to occur naturally in the area.

The VFW Road Contamination and the Site are separated by a significant, 60 foot deep valley. Based upon experience, Shield Engineering has concluded that the hydrogeology of this physiographic setting generally replicates ground surface topography. This means that shallower groundwater from the Site most probably flows east to discharge into the valley, and groundwater from the VFW Road homes flows west to discharge into the same valley, with deeper groundwater flowing in a regional pattern to the south. Because the valley is probably a groundwater discharge zone that separates groundwater flow migrating east from the vicinity of the Site from the nearest residential well, located over 650 feet east and northeast of the Site, it is improbable that any groundwater from the Site reaches the VFW Road homes. See Letter Report of Shield Engineering, Inc. regarding VFW Road Contamination dated March 21, 2013 (“Shield Letter Report”) (Attached).

Site Operations and History

Zarn owned and operated the Site from 1960 to 2000. Zarn conveyed the Site to Diakon Molding, Inc. in 2000. Diakon Molding, Inc. subsequently changed its name to A&A Real Estate Services, Inc. (“A&A”). Between 2003 and 2009 other companies, including WEK Molding, Inc., leased and operated the Site. The Site was used continuously for manufacturing blow molded plastic products since development in 1960 until all business activity at the Site ceased in 2009. A&A retains title to the Site.

Stephen Andrews has been intimately involved with the Site since 1985. Based upon his position at Zarn, Mr. Andrews developed knowledge of processes used by Zarn and the subsequent tenants. Mr. Andrews states that to the best of his knowledge neither dieldrin, aldrin, endosulf, endrin, endrin keytone, alpha-chlordane or methoxychlor have ever been used at the Site since its development in the 1960’s as a manufacturing facility. He states further that to the best of his knowledge, no metals, including but not limited to iron, manganese and chromium, have been used on the Site since its development in the 1960’s as a manufacturing facility, with the exception that metals compose parts of the machinery used in the manufacturing processes. See Affidavit of Stephen B. Andrews dated April 3, 2013 (Attached).

In 1992 Zarn removed a 1,000 gallon used hydraulic oil underground storage tank from the Site. Under the oversight of the UST Section of DWM, Zarn conducted a comprehensive soil and groundwater investigation and implemented a soil vapor extraction/bio venting system. The UST Section of DWM issued a Notice of No Further Action for this release on March 7, 2006. This 2006 Notice of No Further Action remains effective unless the UST Section later renders a finding that the 1992 discharge poses an unacceptable risk to human health or the environment. The UST Section has rendered no finding that the 1992 discharge poses an unacceptable risk to human health or the environment.

In 1997 Zarn investigated and reported to DENR's Division of Water Quality an unusual stormwater discharge. Investigation led to the conclusion that the discharge was related to the use of a petroleum-based herbicide that had been applied for weed control. Sampling of the stormwater did not detect any impacts to the water sample and no further action was recommended.

On March 8, 2011, the UST Section of DWM issued a Notice of No Further Action to WEK Molding, Inc., a former tenant operating at the Site, with regard to a 2006 hydraulic oil release from an above ground storage tank. This 2011 Notice of No Further Action remains effective unless the UST Section later renders a finding that the 2006 discharge poses an unacceptable risk to human health or the environment. The UST Section has rendered no finding that the 2006 discharge poses an unacceptable risk to human health or the environment.

Sources of VFW Road Contamination

Shield Engineering has concluded that operations at the Site are not the source of the VFW Road Contamination. The Site is hydraulically separated from the VFW Road Contamination. There is no evidence that pesticides or metals were ever used in any operations at the Site. Because metals have an affinity for soil particles in the subsurface and do not readily migrate very far, it is improbable that metals contamination could have migrated from the Site and caused the VFW Road Contamination more than 700 feet away.

At the request of this law firm and as a service to DWM, Shield Engineering conducted research to determine what identifiable activities might be the sources of and hydraulically connected to the VFW Road Contamination. Shield has concluded that the volatile organic compounds in the wells on the northern part of VFW Road are from a source (or sources) that is separate and distinct from the pesticide contamination (primarily dieldrin) found in the two wells located on the southern portion of VFW Road. Shield has further concluded that the metals detected in the wells are most likely naturally occurring, based upon the levels detected.

Shield's research has identified an automotive repair shop, Smith Automotive, located 600 feet north and upgradient of the wells impacted by volatile organic compounds. Automotive repair shops commonly have used volatile organic compounds in their operations. Smith Automotive is identified on Figure 2 of the Shield Letter Report.

Shield also identified an industrial park comprised of 90 acres and 1.2 million square feet of industrial and warehouse space less than 500 feet upgradient of the wells impacted by volatile organic compounds. This industrial park, formerly operated by the American Tobacco Company, was built in 1963 and operated there for decades. Operations at this sprawling facility are likely sources of the volatile organic compounds that comprise a portion of the VFW Road Contamination at the northern end of VFW Road. The American Tobacco Stemmary is also identified on Figure 2 of the Shield Letter Report.

The pesticides (primarily dieldrin) found in the two southernmost wells on VFW Road likely derive from the historic agricultural activity on the 18-acre parcel contiguous to those two contaminated wells. A 1982 photograph included in the Shield Letter Report, for example, plainly shows contoured crop cultivation on this adjacent property. The agricultural land is at a higher elevation than the impacted wells and subject to the same hydraulic component as the wells. Because this agricultural land is adjacent to the impacted wells and on the same side of the groundwater discharge zone as the wells, the adjacent agricultural land is the likely source of the pesticide contamination.

The Owners and Operators of the Site are not “Responsible Parties” under applicable law.

A “responsible party” is one who discharges or deposits a hazardous substance with the result that the discharge creates an inactive hazardous substance or waste disposal site. “The State must show that a danger to the public health or the environment existed” NCGS § 130A-310.7(a). *See also Rudd v. Electrolux Corp.*, 982 F.Supp. 355, 364 (M.D. N.C. 1997) (harmful quantities of hazardous substances require releases of hazardous substances in those reportable quantities found at 40 C.F.R. § 117.3).

There is no indication that any volatile organic compound at the Site or VFW Road exceeds 2L standards, which are the standards this state uses to determine threats to public health or the environment. Therefore, no volatile organic compound poses a danger to public health or the environment. The UST Section’s finding that No Further Action is necessary with regard to the historic discharges at the Site affirms that DWM has concluded that no volatile organic compound poses a danger to public health or the environment. Under these circumstances, the historic discharges of volatile organic compounds at the Site cannot properly lead to a request by DWM for any owner or operator of the Site to conduct a remedial investigation at VFW Road.

There is no evidence that iron, chromium or manganese were ever used as raw materials in Site operations, much less discharged or deposited, at the Site. The iron, chromium and manganese found at the VFW Road wells are well within naturally occurring levels. DWM has no authority to request that a private party conduct a remedial investigation of naturally occurring constituents such as iron, chromium or manganese.

There is no evidence that dieldrin was ever used by any owner or operator at the Site. Where there is no evidence of any use of the hazardous substance that requires investigation, much less evidence of any discharge of that hazardous substance at the Site, DWM has no

authority to request any owner or operator of the Site to investigate the sources of dieldrin or other pesticides found over 900 feet away from the Site and separated by a 60 foot deep groundwater discharge zone.

Consequently, for the reasons stated above no owner or operator of the Site is a responsible party under NCGS § 130A-310.7. If new information becomes available that changes our current understanding of the facts and circumstances related to the VFW Road Contamination, Zarn is certainly interested in having that information made available to it so that it may consider that information as appropriate. The owners and operators of the Site must at this time respectfully decline the request to conduct a remedial investigation of the VFW Road Contamination.

If you have any questions about this evaluation or I can be of further service, please do not hesitate to contact me directly.

Sincerely,

ROBINSON BRADSHAW & HINSON, P.A.

William W. Toole

STATE OF NORTH CAROLINA

AFFIDAVIT OF STEPHEN B. ANDREWS

COUNTY OF ROCKINGHAM

PERSONALLY APPEARED BEFORE ME, Stephen B. Andrews, being duly sworn, deposes and states the following:

1. My name is Stephen B. Andrews. From 1988 to 2000, I was the Vice President, Finance & CFO of Zarn, Inc. ("Zarn"). From 1985 until 1988, I was the Controller at Zarn. I am currently the President and CEO of A&A Real Estate Services, Inc. ("A&A").

2. Zarn owned and operated the facility located at 1001 Northeast Market Street, Reidsville, NC (the "Site") from 1960 to 2000. Zarn conveyed the Site to Diakon Molding, Inc. in 2000. Diakon Molding, Inc. subsequently changed its name to A&A Real Estate Services, Inc. in 2003. Premium Molding leased and operated at the Site from July 2003 until September 2004. One or more subsidiaries of Myers Industries, which included WEK Molding, Inc. and WEK South, Inc., leased and operated at the Site from 2004 until 2009. A&A currently owns the Site.

3. From 1960 until December of 2009, blow molded plastic products were manufactured at the Site. No business activity has occurred at the Site since December of 2009. During my employment with Zarn, I worked directly for the Chief Executive Officer and learned the history of the business directly from him. To my knowledge, the blow molded plastics manufacturing processes at the Site have remained constant and essentially unchanged from 1960 through 2009.

4. As a result of my duties described above, I am familiar with the uses of the Site and the materials used at the Site.

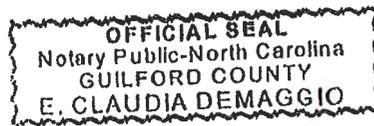

6. To the best of my knowledge, neither dieldrin, aldrin, endosulf, endrin, endrin keytone, alpha-chlordane or methoxychore have ever been used on the Site since its development in the 1960's as a manufacturing facility. To the best of my knowledge, no metals, including but not limited to iron, manganese and chromium, have been used on the Site since its development in the 1960's as a manufacturing facility, with the exception that metals compose parts of the machinery used in the manufacturing processes.

FURTHER AFFIANT SAYETH NOT.

Stephen B. Andrews

Sworn to and subscribed
before me, this 3RD day of
March, 2013.

Subject: **VFW Road Contamination
NONCD 0002894
Evaluation of Potential Sources of Groundwater Impact
1001 NE Market Street Extension
Reidsville, North Carolina
Shield Project No. 1130034**

Dear Mr. Toole:

The North Carolina Department of Environment and Natural Resources (NCDENR) Inactive Hazardous Sites Branch (IHSB) has requested a remedial investigation of the facility at 1001 NE Market Street (Figure 1) in Reidsville, NC (the Site). The Site is being targeted for inclusion by the IHSB for identified regional groundwater quality impairment. Several water supply wells at residences on VFW Road over approximately 700 feet northeast of the Site sampled in 2012 contained detectable concentrations of chlorinated solvent related compounds (1,1,1-TCA and 1,1 DCE). However, these compounds are below the North Carolina Administrative Code 2L Standards (2L Standards). The pesticide dieldrin was detected in water supply wells in a separate cluster of residences more than 900 feet east of the Site at levels exceeding 2L Standards. Other pesticides were detected below action levels in the wells impacted by dieldrin. Metals have been detected in most of the sampled wells but below the 2L Standards, except iron and manganese in one well, and chromium in another. These are naturally occurring metals. Magnesium, for which there is no 2L Standard, was also detected and is a naturally occurring metal.

Scope of Services

Shield Engineering Inc. (Shield) was requested by Robinson Bradshaw & Hinson to evaluate whether, based on hydrogeology and other factors, the Site would likely be the source of contamination in the residential wells. For this evaluation Shield reviewed an Environmental Data Resources, Inc. radius report of facilities listed on various regulatory databases, City Directories of the area, topographic maps, current and historic aerial photographs, and selected tax information on the Rockingham County online Geographic

Information System. This information is provided in the attached Appendix. Shield also reviewed aerial and street level photographs available by Google Maps™ and a Loopnet™ online commercial sales listing for a nearby property.

Groundwater Flow Direction

The topography shown on the attached Figure 1 illustrates a deep unnamed drainage feature between the Site and the residential wells sampled along VFW Road. This drainage feature flows north to south. The bottom of the feature is about 60 feet lower in elevation than nominal ground surface at both the Site and at the residences which were sampled along VFW Rd. This means the Site and the residences along VFW Road are separated by a significant valley.

Based on our experience with the hydrogeology in this physiographic setting, groundwater flow is generally a replica of ground surface topography. Moreover, in such conditions groundwater tends to discharge into lower elevation drainage features such as the valley that separates the Site from the VFW Road wells. It is likely that the shallower groundwater from both the east and west side of the unnamed drainage feature discharges into the drainage feature while the deeper groundwater would flow to the south in a more regional pattern. We conclude that the drainage feature is most probably a groundwater discharge zone that separates groundwater flow migrating east from the vicinity of the Site from the residential wells further east and northeast of the Site.

Groundwater flow from the Site is estimated to be toward the south and southeast, away from the location of the affected residential wells and following the drainage feature that flows to the south.

Potential Sources of Solvents

There is a vast difference in the types of groundwater impact (solvents and pesticides), and the locations of impacted well groups are relatively widely separated. These observations indicate separate sources of impact to the water supply wells. These separate sources are most likely to be land east of the drainage feature.

Our review of historical records identified several potential sources of solvent impact to the VFW Road wells. These potential sources are shown on Figure 2 and discussed below:

- An industrial park comprised of 90 acres and 1.2 million square feet of industrial and warehouse space once occupied by American Tobacco Company is situated upgradient and northeast of and less than 500 feet from the wells impacted with solvents. The facility was built in 1963 and included tobacco stemming (curing and storage). Ancillary operations likely included the use of solvents for machine shop applications and/or similar equipment cleaning.

- Smith Automotive, which operates an automotive repair shop, is located at 5816 Old U.S Highway 29. It is situated north and apparently upgradient of the impacted residential wells. Automotive repair shops commonly have used solvents in their routine operations.
- A BP Service Station is located at 5584 Old U.S. Highway 29, southwest of the solvent impacted residential wells.
- Residences in the vicinity of the impacted residential wells could have used solvents such as those used in automotive repair. Even small quantities improperly used and/or disposed have the potential to impact groundwater.

Potential Source of Metals

Many, if not all of the metals detected in the area supply wells are naturally occurring, and the levels detected are within the ranges of naturally occurring levels. Metals have a great affinity for soil particles in the subsurface and do not readily migrate very far. It is highly unlikely that the metals detected in the area supply wells originated from the Site, approximately 700 feet or more, away and separated by a significant discharge zone.

Potential Source of Pesticides

The approximately 18-acre property contiguous to the two dieldrin impacted residences contained a cleared area that shows up as far back as the 1971 aerial photograph. Dieldrin and the other detected pesticides are most commonly associated with agricultural activity. The striated appearance on the 1982 aerial photograph suggests the land was crop cultivated in contoured rows. The Property Tax Card has the property as "agricultural vacant land." The cleared area is on the same side of the groundwater discharge zone within a few hundred feet of and closest to the water supply wells impacted by pesticides. This agricultural field is the probable source of the pesticide impacts.

Aerial photographs indicate that one of the two residences containing dieldrin in the water supply well samples has a swimming pool. Filling a swimming pool would likely increase the demand for water, with correlated heavy groundwater pumping having the effect of increasing the likelihood of pulling groundwater from the direction of the cultivated land. Shield has been told that dieldrin has not been used at the Site.

Conclusions

Based on various hydrogeological factors affecting the estimated groundwater flow direction in the Site area, we conclude the Site is on the west side of a significant groundwater discharge zone with the impacted wells being on the east side. Based on the unrelated nature of the chemicals of concern and on the widely separated locations of the impacted well clusters, there is likely more than one source that caused the groundwater

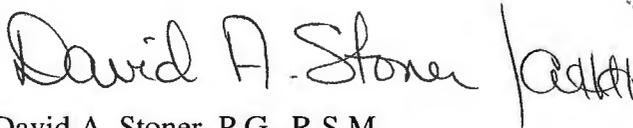

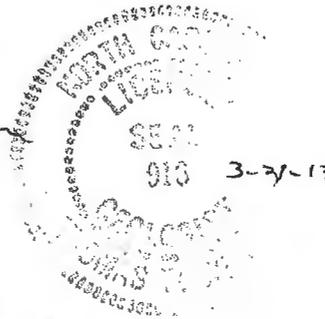

impairments. Potential sources of solvent contamination exist upgradient and on the same side of the groundwater discharge zone as the impaired VFW Road wells and are most likely to be the sources of the groundwater impairment of the impacted wells. The detected metals are likely naturally occurring; certainly the Site is too distant and separated by the groundwater discharge zone for the Site to be the source. In the case of pesticides in general, and dieldrin which is the only detected pesticide above the 2L Standards, the agricultural land adjacent to and on the same side of the groundwater discharge zone as the impacted wells is the likely source.

We appreciate the opportunity to provide our professional services to Robinson Bradshaw & Hinson. Please contact us if you have any questions concerning this report.

Sincerely,

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-CESQG site within approximately 0.75 miles of the target property.

<i>MYERS BODY</i>	<i>5433 US HWY 29 BUS</i>	<i>NE 1/4 - 1/2 (0.358 mi.)</i>	<i>D14</i>	<i>23</i>

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environment & Natural Resources' Inactive Hazardous Sites Program.

A review of the SHWS list, as provided by EDR, and dated 12/28/2012 has revealed that there is 1 SHWS site within approximately 1.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incidents Management Database contains an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environment, & Natural Resources' Incidents by Address.

A review of the LUST list, as provided by EDR, and dated 11/09/2012 has revealed that there are 2 LUST sites within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environment & Natural Resources' Petroleum Underground Storage Tank Database.

A review of the UST list, as provided by EDR, and dated 11/09/2012 has revealed that there are 6 UST sites within approximately 0.75 miles of the target property.

Other Ascertainable Records

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 07/20/2011 has revealed that there is 1 ICIS site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
DANIEL S THRIFTY MART	813 MADISON STREET R	SW 1/4 - 1/2 (0.328 mi.)	C11	18

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 10/23/2011 has revealed that there are 4 FINDS sites within approximately 0.5 miles of the target property.

Financial Assurance: A listing of financial assurance information for underground storage tank facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.

A review of the Financial Assurance list, as provided by EDR, and dated 09/23/2011 has revealed that there is 1 Financial Assurance site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 5 EDR US Hist Auto Stat sites within approximately 0.75 miles of the target property.

Environmental Interest/Information System

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

NC-FITS (North Carolina - Facility Identification Template For States) is North Carolina Department of Environment and Natural Resources' (NCDENR) Facility Identification Template for States that provides a common facility identifier in order to improve accessibility to comprehensive information about environmental regulated entities in the state of North Carolina.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Owner/Op start date: Not reported
Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING,

BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with

Map ID
Direction

COMMUNITY MART (Continued)

1014784372

a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 03/01/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 03/01/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

	Data Release Frequency: No Update Planned

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/01/2012	Source: EPA
Date Data Arrived at EDR: 10/11/2012	Telephone: N/A
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 03/01/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/02/2012	Source: EPA
Date Data Arrived at EDR: 11/28/2012	Telephone: 703-412-9810
Date Made Active in Reports: 01/07/2013	Last EDR Contact: 03/01/2013
Number of Days to Update: 40	Next Scheduled EDR Contact: 06/10/2013
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/31/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2012	Telephone: 703-603-8704
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 01/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 04/22/2013
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/12/2013

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013
Date Data Arrived at EDR: 02/15/2013
Date Made Active in Reports: 02/27/2013
Number of Days to Update: 12

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/12/2013

Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/12/2013

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2012	Telephone: 703-603-0695
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 12/10/2012
Number of Days to Update: 63	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 12/19/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/26/2012	Telephone: 703-603-0695
Date Made Active in Reports: 02/27/2013	Last EDR Contact: 12/10/2012
Number of Days to Update: 63	Next Scheduled EDR Contact: 03/25/2013
	Data Release Frequency: Varies

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 02/18/2013
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/03/2013
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 01/17/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Annually

State- and tribal - equivalent NPL

HSDS: Hazardous Substance Disposal Site

Locations of uncontrolled and unregulated hazardous waste sites. The file includes sites on the National Priority List as well as those on the state priority list.

Date of Government Version: 08/09/2011	Source: North Carolina Center for Geographic Information and Analysis
Date Data Arrived at EDR: 11/08/2011	Telephone: 919-754-6580
Date Made Active in Reports: 12/05/2011	Last EDR Contact: 02/04/2013
Number of Days to Update: 27	Next Scheduled EDR Contact: 05/20/2013
	Data Release Frequency: Biennially

State- and tribal - equivalent CERCLIS

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SHWS: Inactive Hazardous Sites Inventory

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 12/28/2012	Source: Department of Environment, Health and Natural Resources
Date Data Arrived at EDR: 01/03/2013	Telephone: 919-508-8400
Date Made Active in Reports: 02/01/2013	Last EDR Contact: 01/03/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/01/2013
	Data Release Frequency: Quarterly

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: List of Solid Waste Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/25/2012	Source: Department of Environment and Natural Resources
Date Data Arrived at EDR: 09/27/2012	Telephone: 919-733-0692
Date Made Active in Reports: 10/26/2012	Last EDR Contact: 01/21/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 04/15/2013
	Data Release Frequency: Semi-Annually

OLI: Old Landfill Inventory

Old landfill inventory location information. (Does not include no further action sites and other agency lead sites).

Date of Government Version: 01/16/2013	Source: Department of Environment & Natural Resources
Date Data Arrived at EDR: 01/22/2013	Telephone: 919-733-4996
Date Made Active in Reports: 02/04/2013	Last EDR Contact: 01/17/2013
Number of Days to Update: 13	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Varies

State and tribal leaking storage tank lists

LUST: Regional UST Database

This database contains information obtained from the Regional Offices. It provides a more detailed explanation of current and historic activity for individual sites, as well as what was previously found in the Incident Management Database. Sites in this database with Incident Numbers are considered LUSTs.

Date of Government Version: 11/09/2012	Source: Department of Environment and Natural Resources
Date Data Arrived at EDR: 11/14/2012	Telephone: 919-733-1308
Date Made Active in Reports: 12/27/2012	Last EDR Contact: 02/13/2013
Number of Days to Update: 43	Next Scheduled EDR Contact: 05/27/2013
	Data Release Frequency: Quarterly

LUST TRUST: State Trust Fund Database

This database contains information about claims against the State Trust Funds for reimbursements for expenses incurred while remediating Leaking USTs.

Date of Government Version: 01/11/2013	Source: Department of Environment and Natural Resources
Date Data Arrived at EDR: 01/15/2013	Telephone: 919-733-1315
Date Made Active in Reports: 02/06/2013	Last EDR Contact: 10/17/2013
Number of Days to Update: 22	Next Scheduled EDR Contact: 04/29/2013
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LAST: Leaking Aboveground Storage Tanks

A listing of leaking aboveground storage tank site locations.

Date of Government Version: 11/09/2012	Source: Department of Environment & Natural Resources
Date Data Arrived at EDR: 11/14/2012	Telephone: 877-623-6748
Date Made Active in Reports: 12/27/2012	Last EDR Contact: 02/13/2013
Number of Days to Update: 43	Next Scheduled EDR Contact: 05/27/2013
	Data Release Frequency: Quarterly

INDIAN LUST R9: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Arizona, California, New Mexico and Nevada

Date of Government Version: 09/06/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/07/2012	Telephone: 415-972-3372
Date Made Active in Reports: 10/16/2012	Last EDR Contact: 01/28/2013

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oil waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

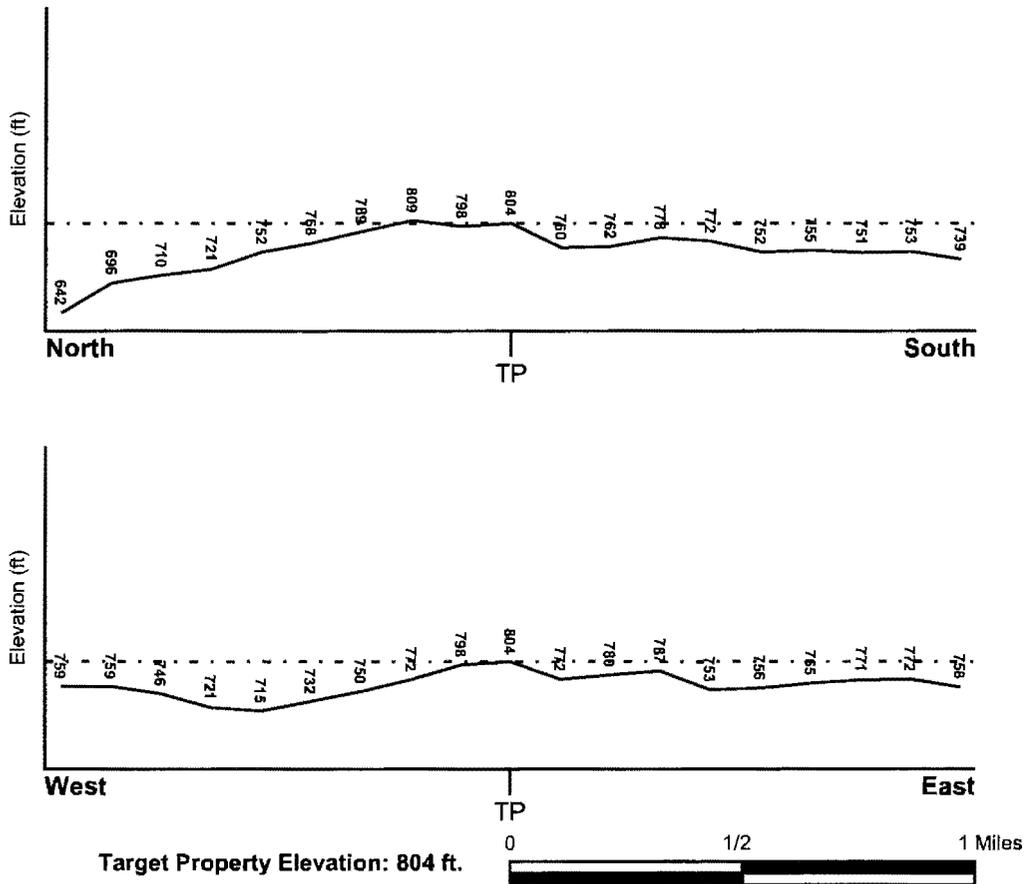

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> ROCKINGHAM, NC	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
---	---

Flood Plain Panel at Target Property: 37157C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> SOUTHEAST EDEN	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era:	Paleozoic	Category:	Metamorphic Rocks
System:	Pennsylvanian

Code:	mm1 (<i>decoded above as Era, System & Series</i>)		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	PACOLET
Soil Surface Texture:	fine sandy loam
Hydrologic Group:	Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class:	Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.
Hydric Status:	Soil does not meet the requirements for a hydric soil.
Corrosion Potential - Uncoated Steel:	HIGH
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 2.00	Max: 6.50 Min: 4.50
2	3 inches	29 inches	sandy clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 6.00 Min: 4.50
3	29 inches	52 inches	clay loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 2.00 Min: 0.60	Max: 6.00 Min: 4.50
4	52 inches	70 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 2.00 Min: 0.60	Max: 6.00 Min: 4.50

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: clay loam
gravelly - sandy loam
sandy loam
loam

Surficial Soil Types: clay loam
gravelly - sandy loam
sandy loam
loam

Shallow Soil Types: clay
sandy clay loam
silt loam
clay loam
silty clay loam

Deeper Soil Types: fine sandy loam
weathered bedrock

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

Telephone: 919-715-3243

OTHER STATE DATABASE INFORMATION

NC Natural Areas: Significant Natural Heritage Areas

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

A polygon coverage identifying sites (terrestrial or aquatic that have particular biodiversity significance.

A site's significance may be due to the presence of rare species, rare or high quality natural communities, or other important ecological features.

NC Game Lands: Wildlife Resources Commission Game Lands

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

All publicly owned game lands managed by the North Carolina Wildlife Resources Commission and as listed in Hunting and Fishing Maps.

NC Natural Heritage Sites: Natural Heritage Element Occurrence Sites

Source: Center for Geographic Information and Analysis

Telephone: 919-733-2090

A point coverage identifying locations of rare and endangered species, occurrences of exemplary or unique natural ecosystems (terrestrial or aquatic), and special animal habitats (e.g., colonial waterbird nesting sites).

RADON

State Database: NC Radon

Source: Department of Environment & Natural Resources

Telephone: 919-733-4984

Radon Statistical and Non Statistical Data

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

www.edrnet.com

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.
