Mr. Christopher Cox
Hanesbrands Inc.
1000 East Hanes Mill Road
Winston Salem, NC 27105

SUBJECT: Review of Limited Soil Vapor Assessment Report
Former Hanesbrands Industrial Facility
700 South Stratford Road, Winston Salem, Forsyth County, NC
Site ID: NONCD0002945

Dear Mr. Cox:

The NC Inactive Hazardous Site Branch (the Branch) has reviewed the subject report. The report summarizes the results of a limited on site soil vapor assessment conducted by the current property owner. The results reinforce the Branch's assertion that the vapor intrusion risk at the adjacent properties must be evaluated. The on-site groundwater data and soil vapor data clearly indicate that the vapor intrusion evaluation at the adjacent properties is necessary. You must also conduct a receptor survey as indicated in the NORR letters sent to you by the Branch on July 29, 2013 and October 9, 2013.

We are requiring Hanesbrands to submit a work plan that addresses the vapor intrusion risk evaluation at the adjacent properties and receptor survey around the former Hanesbrands Facility. This work plan must be received by the Branch within the thirty (30) days from the receipt date of this letter.

Please do not hesitate to contact me if you have any questions about this letter or the actions required.

Sincerely,

Qu Qi, PG
Inactive Hazardous Waste Site Branch
Division of Waste Management
