MPT Davy,

I will forward these questions to Sean Boles. However, some of this may be out of his lane. We would not have this information with the City due to its age. The best point of contact is with the NC Division of Waste Management. If Sean doesn't know he should be able to point Ms. Smith in the right direction. Maybe the County Health dept. would be helpful too.

Sincerely,

Rus

Rusty Thompson, PE, PTOE

Thank you Tawanya and the many others that are interested in this important cause.

I have copied our director: Rusty Thompson to this email for further details. I am assuming a lot of this information can be provided when Mr Boules come and presents to the group.

Warmest regards,

Kady-Ann Davy, MBA

Good Day Ms. Davy,

Just wanted to expound on the topic we discussed on Saturday, September 13, 2014 at the monthly Savoy Heights Community Association meeting with regard to the chemical plant. Upon doing much research over the past few weeks I have found that the available resources are limited via internet search on the past history of the chemical plant facility located at 616 Commerce Street and 636 Robeson Street.

With all due respect in the areas of communicating with city and state agencies, I find that the most important information required and needed at this time from them would be as follows;

1. Any air quality control reports that dates between 1960-present (although this may not have been a requirement for factory operations during the early years, the earliest time will be a start).
2. When/Who regulated factory facilities during 1960-1980, if any.
3. Any environmental reports on facility; citing, etc. during 1960- present.
4. History of chemical plant- name, DBA, name changes during the time of active operations.
5. Any and all Fire Dept. reports between 1960- end of operations.
6. Who approved development of the Savoy Heights Community (history of land prior to building subdivision).

7. Current owners and year purchased. Did they disclose purpose intended for use of commercial property?

8. Was below ground chemical evaluations completed at any time between 1970-1990 and the reports? Is there still possible chemicals below ground in the area where the tower was affixed?

9. Were there any hazardous signage located on the exterior of the property during operations? Were the residents notified by any city officials regarding the hazards of the plant during the 1960-1980 time frame and if so who notified them? Is there evidence of this?

10. What were the hazards considered; physical hazard, health hazard, simple asphyxiant hazard, pyrophoric gas hazard, or HNOC (hazards not otherwise classified)?

I understand that this is a lot of information and I will continue to work on these findings as well. Can you provide a contingent date that this information will be gathered or initiated in locating all possible resources? I look forward to hearing from you soon and I will be in touch. Also if you have delegated a point of contact for this please provide me with name, number, or an email address for that person.

With Kind Regards, I AM

Tawanya Smith
