Subject: *Phase II Remedial Investigation Work Plan Addendum*
IHSB Site Name: Towers Road Disposal Area
IHSB Site ID No.: NONCD0002893

Dear Ms. Thomas:

This letter is to inform you of a change in the approach for munitions response support during the Phase II Remedial Investigation activities. Because the Remedial Action at 2nd Street Disposal Area was completed and no munitions items are expected to remain on site, an Explosives Safety Submission Determination Request was submitted to the Naval Ordnance Safety and Security Activity to reduce the level of munitions response support needed. Naval Ordnance Safety and Security Activity approved the Explosives Safety Submission Determination Request on January 7, 2016. As a precautionary measure, all personnel will receive munitions awareness training prior to performing work on site and on-call unexploded ordnance (UXO) construction support will be available in the event that suspected munitions are encountered.

Please contact me at 757-671-6231 if you have any questions or comments.

Sincerely,
CH2M
