Re: Poole Road OCE/ Paul's Cash Grocery

---

---

Received a telephone call from Jon Vinroot, Public Water Supply, 919-791-4294 concerning POE treatment system at Paul's Cash Grocery. Jon and I discussed the nature of the contamination onsite, and I directed him to the online file portal for more details.

Jon described concerns regarding the disposal of the backwash from the system, and whether, under the Public Water Supply regulations, an operator would be required for the system. He said he needed to get some more questions answered and read some of the site-specific information. We agreed to speak again.

I sent Jon via email the latest groundwater monitoring report from the UST contractor.
