**Reference: Quarterly Letter Status Report
Former Santaro Hot Asphalt Plant
2856 NC Highway 66
Kernersville, North Carolina
Site ID No. NONCD0002445**

Dear Mr. Aufman:

In accordance with Section III, E of the Administrative Agreement for referenced site, this letter is intended to serve as the status report for the quarterly period from July 15, 2015 to October 15, 2015. Monitoring wells MW-3D, MW-6, and MW-11D were sampled in July 2015 for volatile organic compounds following the installation of alternate hydrogen emitters in all three wells. The results were not conclusive following the brief period of time since the installation, an insufficient hydrogen supply at MW-6, and increased pressure required in MW-11D. We anticipate lab results of the October 2015 groundwater monitoring will conclude the feasibility study and confirm passive hydrogen injection will be the preferred remedial alternative for groundwater as recommended in the Remedial Action Plan. The Remedial Action Plan/Preconstruction Report/Construction Completion Report is anticipated to be submitted in November 2015. Work is progressing in a manner to achieve work phase completion deadlines required per 15A NCAC 13C.0302(h).

Should you have any questions regarding this quarterly status report or require additional information, please contact the undersigned.

Very truly yours,

ENVIROTRAC LTD.
Firm License No. C-457

A handwritten signature in black ink that reads "Chris Hay". The signature is written in a cursive, flowing style.

Christopher W. Hay, EI, RSM
Regional Operations Manager
