Re: Alexander County groundwater assessment progress, permit no. 02-01

Dear Mrs. Drummond,

I wanted to write and give you an update on the progress that Alexander County is making. As you are aware there is a need to place monitoring wells on some adjoining property. This has proven to be quite challenging. The good news is that the easements have been mailed and well placements have been marked. I have met with the property owner to the north and we observed the well placements on his property. The property owner to the southeast has received the easement and forwarded it to their attorney. Three wells are to be placed off property along with seven new wells on property, according to plans prepared by Municipal Engineering. The installation of these wells will begin as soon as the easements are approved. I have been working diligently to get this project going and hopefully keep our construction and demolition landfill operational. If you have any questions do not hesitate to call.

Sincerely,

Josh Mitchell
