**Global Presence
Personal Attention**

Mr. Paul Crissman, Chief
Solid Waste Section, Division of Waste Management
North Carolina Department of Environment & Natural Resources
1646 Mail Service Center
Raleigh, North Carolina 27699-1646

June 19, 2008

Dear Mr. Crissman:

**Notification of Appendix II Detections
Charlotte Motor Speedway, Landfill V, Permit 13-04**

On behalf of the Charlotte Motor Speedway, Landfill V, Herst & Associates, Inc. is submitting notification of Appendix II constituents detected in site groundwater monitoring wells during the Second Quarter 2008 sampling event. This notification is in accordance with NCDENR Requirements for Municipal Solid Waste Landfill Facilities Section .1634(d), which states the following:

"After obtaining the results from the initial or subsequent sampling events required in Paragraph (b) of this Rule, the owner or operator shall: (1) Within 14 days, submit a report to the Division and place a notice in the operating record identifying the Appendix II constituents that have been detected;"

Groundwater samples were collected by Prism Laboratories, Inc. in May 2008. Analytical testing was performed by Analytical Services, Inc. for the assessment monitoring wells (MW-12, MW-14, MW-18A, MW-19, MW-19A, and MW-20B). Results were received by Herst & Associates, Inc. on June 10, 2008. The attached table summarizes the Appendix II constituents that were detected in assessment monitoring wells during the Second Quarter 2008 event. Consistent with past events, the inorganic and organic detections are also on the Appendix I Detection Monitoring list, with the exception of mercury and tin.

The full groundwater report and statistical evaluation will be submitted per Sections .1632 and .1633.

Should you have any questions or concerns, please contact the undersigned at your convenience.

Sincerely,

HERST & ASSOCIATES, INC.

Ward E. Herst, LG
Managing Director

Steve Jett, LG
Senior Hydrogeologist

Attachment: Appendix II Detections Summary Table
