Subject: 2011 closure of GlaxoSmithKline RTP solid waste incinerator and solid waste permit 32-09-I

Hi Donna,

Thank you for the opportunity to discuss the pending closure of GSK's solid waste incinerator in RTP, regulated by Solid Waste Permit No. 32-09-I, earlier today. My recollection of our conversation is summarized below:

- GSK's goal is to complete closure of the unit by the end of June 2011.
- When incinerator operations have ceased, wastes have been removed and GSK believes it has completed closure activities, we will notify NCDENR Solid Waste Section in writing, and request closure of permit 32-09-I.
- The Solid Waste Section will schedule and conduct an inspection and, if no issues remain, will proceed with closure of the permit.

Please let me know if I have inadvertently missed or mis-stated our conversation. Thanks for your assistance with this.

Best regards,

Lindsey C. Walata, PG
