Re: Nature and Extent Study/Assessment of Corrective Measures
Edgecombe County Landfill, Permit #33-01

Dear Mr. Bagley,

The Solid Waste Section (Section) has reviewed the *Nature and Extent Study and Assessment of Corrective Measures Report*, submitted on behalf of Edgecombe County by S&ME, Inc. for the Edgecombe County Landfill. Contaminant concentrations exceeding North Carolina groundwater standards have been detected at the facility, and as a result, corrective action is necessary. Edgecombe County should proceed with the selection of a remedy to restore groundwater quality and effectively reduce the contamination at the site.

The remedy(ies) selected must meet the requirements listed in the North Carolina Solid Waste Management Rules and Laws 15A NCAC 13B Sections .1635 through .1636 and Classifications and Water Quality Standards Applicable to the Groundwaters of North Carolina 15A NCAC Subchapter 2L.

Solid Waste Management Rules governing the Edgecombe County Landfill require a public meeting to discuss the results of the assessment of corrective measures. Edgecombe County then shall select a remedy in accordance with the requirements of 15A NCAC 13B .1636 and submit the remediative measure(s) and contingencies for approval by the Section. Implementation of the approved remediative measure(s) shall then take place in accordance with 15A NCAC 13B .1637.

The intention of this letter is to clarify what has been accomplished thus far and what will be needed in the near future to complete this stage of the environmental investigation and the effective remediation of this site. Please contact me at (919) 508-8520 or by e-mail at ervin.lane@ncmail.net if you have any questions or concerns regarding this correspondence.

Sincerely,

Ervin Lane
Hydrogeologist
