RE: Monitoring Well Installation - Closed Out Cells  
Dunn/Erwin Landfill  
Harnett County, North Carolina

Dear Mr. Bateson:

This letter requests the installation of two new monitoring wells at the Dunn/Erwin Landfill. These are being installed at the request of NCDEHNR in connection with the closure of the old cells. The location of the wells are shown on the attached map, as discussed in our December 19, 1995 and FAX correspondence of March 12, 1995.

The wells will be installed under the supervision of a North Carolina licensed geologist and in accordance with NCDEHNR's regulations. It is our understanding that prior to installation, NCDEHNR will transmit any specifics for well installation that are currently required.

We would like to begin the field work for these installations on or about April 01, 1996 therefore your expedient review of this request is greatly appreciated.

Included with this request is a sketch showing the location of the two monitoring wells as discussed in that December 19, 1995 and per our FAX correspondence.

Should you have any questions regarding this request, please don't hesitate to contact me.

Sincerely,

McKIM & CREED ENGINEERS, P.A.

Tom Wainwright, P.E.  
Project Engineer
